"There are landfills somewhere with copies of crappy games like *Wayne's World*, *Dick Tracy*, *Addams Family Values*, and all four different side-scrolling *Batman* titles"

Recently, I heard a rumor that a software company was trying to license the Jerry Springer show for an upcoming fighting game. As outrageous as this may sound, with how fast licenses are being snatched up, it wouldn't surprise me at all. In the last few months alone, deals have been signed to make games based on *Austin Powers*, *The Blair Witch Project*, *Blade*, *Evil Dead*, *The World is Not Enough*, and *The Mummy*. Although most of these licenses seem like they would make interesting games, I've neglected to list all the bad licensing deals. This licensing frenzy scares me, gives me a strange sense of déjà vu....

Oh yeah, I remember. In the early '90s, at the height of the 16-bit video game era, companies licensed everything. A trend which I still feel almost killed the video game industry. Publishers grabbed a new movie license, took an existing game engine, changed textures, swapped in new characters, and quickly churned out hundreds of new games. Instant big sellers, right? Hardly. There are landfills somewhere in Arizona with copies of crappy games like *Wayne's World*, *Dick Tracy*, *Addams Family Values*, and all four different side-scrolling *Batman* titles. The bottom line? A good license does not make a good game.

Don't get me wrong, I'm excited about some of the upcoming games that are licensed. *Metal Gear Solid* creator Hideo Kojima is the frontrunner to make a PlayStation2 game based on *The Matrix*. If this happens, run to your local game store and get your pre-orders in now. The major problem is a lack of creativity and originality. Hopefully game publishers will learn from past mistakes and start making some good licensed games. Or else, pray the world has enough landfill space to ditch all those unsold games.

Letters from Readers

Sega fans unite in confusion for their favorite Nintendo software developer, our secret deal with Orville Reddenbacher is at last uncovered, and a railroad stokes the fire of controversy....

CHOICE WORDS FOR SEGA

I'm sure you guys already know about Sega's future plans for their company as a whole, right? You know, the whole "Sega.com" thing? Well, as a hard-core, loyal Sega fan I would like to say this: what the hell is wrong with Sega? They plan on focusing on software as opposed to hardware in the future, *whether Dreamcast succeeds or not*. What kind of bull is that? What they're basically trying to say is that they're scared of their competitors, afraid of PlayStation2, Dolphin, and X-Box and that they're eventually going to leave all of us DC owners and Sega fans hangin' once again. That is *not* the Sega that I have been so loyal to all these years.

I work at a video game store. I have turned so many anti-Sega gamers into believers just because I think Sega deserves a lot more respect, and I really want to see Dreamcast succeed. But now I wonder if it's worth it. Sega, don't be stupid, stay with Dreamcast and kick Sony's ass!

shipped it. I like your magazine, but it stinks! Yes, I do play games more than smell magazines, but I love the smell of fresh paper when I get a new magazine. Maybe you could insert some game-related perfumes. Final Fragrance VIII, Perfume Raider IV, and WWF Smelldown. What do you think? Do you smell what the magazine is cookin'?

IN DEFENSE OF RAILROAD TYCOON

Looking at your hot and cold column (Issue 2), I get the feeling you are making fun of *Railroad Tycoon*

for PlayStation. I realize *Railroad Tycoon* lacks the flash and eye candy of other PS games, but it has more depth. *Tycoon* offers your imagination total creative control; it seems some of today's gamers can't handle using their minds to construct their own worlds. They'd rather be led down a path and told what to do. If the console industry is to grow even more mainstream, then more original and fun titles need to be made. One only need look at Hollywood to see that sequelization hurts the industry and creativity. So please give games that are different a fair chance. More kids need to be in their backyards with a Tonka truck and a pile of dirt. Maybe then their imagination can grow and their tastes can expand.

- Raoul Khan, via email

AND NOW, COMPLETELY UNEDITED....

I was reading your trick's in the back of your magazine and I notice there were tricks on *star wars episode 1* on playsation. At the top of the column you said the movie is bad and the game was worse. Well you must not know what a good movie is. It's not as good as the originals but it still is a very cool movie because of one reason Natalie Portman. The game also rocked they need to fire you guy's and get some good reviewer's in there.

"Our partnership with Universal is unprecedented for Konami and very rare in our industry."

MUMMY'S THE WORD *The Mummy* isn't the only film we'd like to see become a game in this deal. Why not *Wild Things* or *Face/Off*?

UNIVERSAL APPEAL

Konami strikes a deal to publish games based around Universal Studios Franchises

Konami and Universal Interactive Studios recently announced that the two companies have formed an alliance in which Konami will market and distribute next generation and interactive games based on Universal Studios franchises. Universal Interactive Studios, best known for producing the *Crash Bandicoot* and *Spyro the Dragon* series, will head-up development efforts.

Immediately, the deal includes *The Mummy*, *Frankenstein* and *Creature from the Black Lagoon*, along with less monster-centric fare like *Dr. Seuss' How the Grinch Stole Christmas*, and a game based on the world's most annoying bird, *Woody Woodpecker*. Since the agreement covers Universal's entire back catalog, it's possible we could be seeing game versions of such film hits as the legendary *Dirty Harry* series, *Face/Off*, *The Mask of Zorro*, and *Wild Things*. And while we're throwing out hypotheti-

cal ideas, how about a *Rocky* boxing game on the PlayStation2? But we'd rather not have to deal with an interactive *Notting Hill*, please. Not to mention *Patch Adams*.

"The power of this strategic alliance lies in Universal's focus on the development of high quality interactive games and Konami's global expertise in marketing and distribution," says Helene Runtagh, Executive Vice President of Universal Studios.

"We are excited about matching Konami's strong international marketing and distribution with Universal's premier mass market properties," said Kazumi Kitau, Managing Director of Konami Co. Ltd. "Our partnership with Universal is unprecedented for Konami and very rare in our industry. It truly leverages the strength of both companies to create a major impact on both our global businesses."

DON'T CALL IT A COME-BACK Iron Mike Tyson may return to the video game ring if Codemasters can manage to seal the deal.

Mama Said Knock You Out

Mike Tyson is lacing up to star in his own boxing game

Inside sources recently revealed that the ring's most infamous fighter, Mike Tyson, is close to signing an exclusive agreement with Codemasters and will be featured in a new game entitled *Mike Tyson's Boxing*. The game will be developed for the PlayStation using a revamped engine of Codemasters' European title, *Prince Naseem Boxing*, and will sport all of Iron Mike's trademark moves and mannerisms, minus that whole ear-biting incident.

The game will be distributed by Activi-

sion, but since the contracts with Tyson are still unsigned, the game's development process has been delayed until the former heavyweight champ is officially on board. This seems like a huge gamble for Codemasters, though, especially considering how Tyson has acted in and out of the ring recently. But it's a gamble that could pay off if Tyson can somehow come back and take the title from Lennox Lewis. Check out future issues of *incite* for more on this breaking story.

Infogrames Accepts Next Mission

Publisher of the first *Mission: Impossible* game gets a crack at its sequel

After reaping big sales from their first *Mission: Impossible* title, Infogrames is already jumping on the gravy train of the second *Mission* film, *M:I-2*. Infogrames' Arra Yerganian, Senior Vice President of Marketing, told gaming trade magazine *MCV* that Infogrames has signed a deal to bring *M:I-2* to a console near you.

Set for release on Memorial Day weekend, the John Woo-directed film follow-up will once again star Tom Cruise, and should feature some astounding, kung fu-fighting, flapping-dove-filled Hong Kong action sequences. Hopefully, Woo's signature high-polish style will inspire Infogrames to improve on their underwhelming first effort, and make a *Mission* title good enough that even the most demanding Woo fans will choose to accept.

Shooting Star

Gran Turismo 2 Soundtrack To Feature Beck, Garbage, Rob Zombie, and STP

Hot on the heels of their *Duke Nukem* tribute album, *Music To Score By*, RED Interactive has just released the soundtrack to Sony's *Gran Turismo 2*. Reading like an indie-rock Whitman's sampler, the album's roster features songs by some of alternative rock's biggest stars – including Beck's "Where It's At," Garbage's "I Think I'm Paranoid," The Foo Fighters' "My Hero," Rob Zombie's "Dragula," and Stone Temple Pilots' "Sex Type Thing." Other bands appearing in the game and on the album include The

Crystal Method, Soul Coughing, Apollo 440, and The Cardigans, the latter of which contributes the appropriately titled song, "My Favorite Game."

Dubbed *Music At The Speed Of Sound*, the album – unlike *Music To Score By* – doesn't include any unreleased tunes, although both The Crystal Method and Rob Zombie songs are remixes. Instead, the disc will feature a demo of the game, authentic car sounds, an interview with the developers, and a limited-edition poster.

INCOMING Checking the latest games out in the coming months, one hit at a time.

DEAD OR ALIVE 2

Tecmo (DC)
Spring

Arcade favorites like Ryu, Tina, Zack, and Kasumi reprising their roles plus new additions like the lovely Helena.

Kick-ass fighting game with top-notch graphics and the bustiest fighters. It could be *Soul Calibur*'s first real rival on Dreamcast.

JOHN INADA

Marketing Manager
"Sure, it'll feature the most advanced technology to date, but it's the hot babes everyone will be talking about."

RAYMAN 2: THE GREAT ESCAPE

Ubisoft (DC)
1st quarter

That loveable, big-nosed, orange-headed, free-floating-limbed hero Rayman.

Same adventure with added bonus of new downloadable games and maps thanks to Dreamcast Internet capabilities.

MONA HAMILTON

Marketing Manager
"It has been redesigned to exploit the Dreamcast with fast and fluid graphics and more diverse gameplay."

ROCK THE RINK

Electronic Arts (PS)
Spring

NHL and NHLPA licence players and nine fantasy teams, all on their worst, penalty box-worthy behavior. Plus, Tia the Puck Girl as "ref."

No-rules, *Blitz*-style three-on-three hockey with plenty of bench-clearing brawls and what would otherwise be illegal maneuvers.

BRIAN COLEMAN

Product Marketing Mgr.
"Rock the Rink will simply be on-ice hockey mayhem."

NEWS

■ **The Rumor**
Nintendo is working on a new *Legend of Zelda* game to be available when their much-anticipated Dolphin system launches in 2001.

■ **We Say**
According to *Zelda* creator Shigeru Miyamoto, a new *Zelda* adventure for Dolphin is in the developmental process, but won't be ready for another five years. Five years!? Ouch! Until then, you'll have to settle for *Zelda: Gaiden* on N64. However, Miyamoto added that the more likely Dolphin launch title would be a new Mario game, as has been the case in the past. Other rumors also hint at an updated *Metroid* game. It's about time!

Skate or Die!

Tony Hawk street-skates his way onto the Dreamcast

Since the day of its release, the PlayStation version of *Tony Hawk's Pro Skater* has been heralded by fans as one of the greatest skateboarding games ever created. While Activision's busy working on the sequel, Crave Entertainment recently announced its plans to publish an enhanced version of the original *Pro Skater* for the Sega Dreamcast. All of the features and real skaters of the popular PlayStation title will be included in the Dreamcast edition, along with a new four-player split-screen "Trick Attack" mode that enables gamers to compete in various skate parks for points and bragging rights. While no official release date has been announced, skaters should expect Tony Hawk to grind onto the Dreamcast sometime during the second quarter of 2000.

Tuning up a New Banjo

Rare offer gamers the first look at *Banjo-Tooie*

Just as you were starting to chip away at *Donkey Kong 64*, Rare releases the first details about the huge follow-up to *Banjo-Kazooie*. Titled *Banjo-Tooie* (get it?), the game will feature nine worlds for a total of about 150 areas.

To cover all this territory, gamers will be able to play as Banjo and Kazooie separately. Also, voodoo shaman Mumbo Jumbo returns, this time as a playable character. Look for at least one mini-game per level and multi-player action. Plus, fans can look forward to technological advances like a more intelligent camera system.

While not definite, Rare has said the most likely release date will be sometime mid-year.

DINO-KAZOOIE Banjo takes on Jurassic form. Note the trademark yellow shorts.

More Bounce to the Ounce

Square's *The Bouncer* looks to power up the PlayStation2

Squaresoft has revealed more tantalizing details about its PlayStation2 launch title, *The Bouncer*. The game is being described as a "Playing Action Movie" due to its seamless interweaving of interactive gameplay and plot-forwarding movie sequences. Since both these elements utilize the same real-time graphics, the end result amounts to an actual playable movie.

Storyline details are still

sketchy, but the protagonist is a man named Sion who has no memory of his past. As he strives to unravel the mysteries of his forgotten life, he encounters a girl named Dominique, as well as other residents of a place called DOB Street. A simpler control system should make the game accessible to the masses, while hardcore gamers will enjoy the mind-boggling level of interactivity of the game's environments.

No.4 TOUGH GUYS

As an ardent fan of cute games, Annette Cardwell ventures into the male psyche to figure out men's aversion to the most adorable stars of gaming.

Remember *Real Men Don't Eat Quiche*? Well, it seems that '80s tome of male empowerment still has some life in it yet; only the updated version would be titled *Real Men Don't Play Cute Games*.

Guys are way too stuck on first-person shooters, sports games, or driving titles for their own good. They will spend hours in front of some complete piece of crap *"Your Sport Here" 2000* or some lame *Metal Gear Solid* knock-off, but would rather have hot pokers stuck in their eyes before they come near *Spyro the Dragon*. In the guy universe, you're almost better off being caught sitting next to your buddy in a theater without a seat between you, or chugging pink cocktails at a pub, or watching a Lifetime TV movie.

But we girls have always known that the guys who wear the toughest exteriors are usually the ones most afraid everyone will someday discover their soft and fuzzy side. Along with his copies of *Penthouse*, don't be surprised to find a Game Boy tucked under his mattress with 20 play hours logged on *Pokémon Red*.

Face it. Some of the best games ever made are cute to the core. Take a look at *Zelda 64*. Dismissing a title based on its cuteness factor is an example of silly male insecurity at its worst. Instead of bashing Pikachu, why not try proving your manliness in other ways. Remember, women always prefer men who can do more than just act hard.

HIGH YIELD BONDS Giants outfielder Barry Bonds will represent Konami's new *ESPN Baseball Tonight* title for Dreamcast

Catch the Highlights

Konami is first up to bat on the Dreamcast with *ESPN Baseball Tonight*

In what amounts to throwing out the first ceremonial pitch of the season, Konami has released the first screenshots of their first Dreamcast sports title, *ESPN Baseball Tonight*. Slated for a Spring 2000 release, these early screens reveal some of the detail and enhancements possible with this next-generation system's state-of-the-art graphics. With over 1,000 individual player animations promised, the game should impressively capture the nuances of the sport.

On top of having San Francisco Giants outfielder Barry Bonds as their box cover boy, the game will be presented in the in-

imitable ESPN style with all the requisite insights and personalities. A host of ESPN commentators will handle the play-by-play, while Chris Berman will surely add some signature color commentary.

As for the gameplay features, fans will be thrilled with a 12-pitch arsenal for each pitcher, touch sensitive throwing, and a strike zone that changes according to each batter. From the sound of things, Konami's baseball game could be a real contender. But the question is whether it's good enough to join the ranks of Sega's exceptional in-house sports titles, *NFL 2K* and *NBA 2K*.

FIELD OF DREAMCAST These early screens of *ESPN Baseball Tonight* show the beginnings of an impressive title.

In association with The NPD Group, here are the top 25 best-selling console games for the first two weeks of December, as well as the single-format console top ten charts.

#1 Best-selling Game

Donkey Kong 64

1 Nintendo / Nintendo 64
There's no escape from Nintendo's ape, as the long-awaited sequel to the SNES masterpiece finally arrives on the Nintendo 64. Exquisite graphics and classic platform game elements should keep software-deprived N64 owners happy for a while.

WWF Wrestlemania 2000

2 THQ / Nintendo 64
Think this is the greatest wrestling game of all time? It doesn't matter what you think! Because it is.

Tomorrow Never Dies

3 Electronic Arts / PlayStation
Bond is back, and this time he's on the PlayStation. Experience thrills, spills, and kills in this spy adventure.

Pokémon Snap

4 Nintendo / Nintendo 64
The evil that is Pokémon continues to grow unabated. This time, you get to hone your photo skills. Lovely.

NBA Live 2000

5 EA Sports / PlayStation
Michael Jordan joins the roster of this perennial PlayStation powerhouse. Thus guaranteeing a championship.

Tony Hawk's Pro Skater

6 Activision / PlayStation
This skateboarding title is one of the best PlayStation games of the year. Coming soon on N64 and Dreamcast.

Resident Evil 3: Nemesis

7 Capcom / PlayStation
The master of lock picking, Jill Valentine, returns to save Raccoon City from zombies. Hold me, Jill - I'm scared!

Toy Story 2

8 Activision / Nintendo 64
For an obligatory movie license game, this one isn't all that bad. It's enough to give you a Woody... doll.

Crash Team Racing

9 Sony / PlayStation
Hey! Ilsa me, Mario Kart! Crash hotwires the concept, but you have to admire his pedal to the metal approach.

Toy Story 2

10 Activision / PlayStation
\$8 for the ticket, \$40 for the Buzz doll, the look on the face of a hardcore gamer playing this game... priceless.

"I cannot wait to get the time to play *Resident Evil 3*. There's no other game like it, I tell everybody."

Horror Survivor

When not acting in such films as *Pitch Black* and *Saving Private Ryan*, **Vin Diesel** spends his time playing *Resident Evil*. Paul Semel looks scared.

For some film actors, the sure sign they've arrived comes when they win an Oscar. For others, it comes when their name first appears above the movie's title, while others feel it comes when their face graces the cover of *Mad* magazine. But for actor Vin Diesel — who's appeared in such films as *Saving Private Ryan*, *Boiler Room*, and the new sci-fi film *Pitch Black* — the sure sign he's arrived will probably come when he's made into a video game character. And as you'd expect for an actor with such high-profile and highly-regarded roles, Vin won't be waiting long. "There's people talking about making a video game of *Pitch Black*," the 32 year-old New Yorker says, "so that may be right around the corner. And that would be cool."

Did you play a lot of games when you were a kid?

I used to play *Pong*. We didn't have it, so I used to go to Radio Shack in New York City and play it.

Was that the first game you got really hooked on?

No, that was *Superman* on Atari. I loved that one. That was the most amazing game.

So what games get you excited on the new consoles these days?

Resident Evil. I cannot wait to get the time to play *Resident Evil 3*. There's no other game like it, I tell everybody. Not *Tomb Raider*, not *Syphon Filter*, not *Metal Gear Solid* — though I do love *Metal Gear Solid*.

When I was playing *Resident Evil 2*, I'd sometimes play for seven hours at a stretch. And there were times I was more scared than I have been in a movie. Like when you're walking down the corridor and the zombies break through the window — so scary.

Well, they're supposed to be making a *Resident Evil* movie.

Yeah, I read the script. George Romero wrote it, and it was great.

Does that mean you'd do the movie if they asked nicely?

Oh yeah. I want to do the movie, I thought it was a great script. It has a very cool feel to it, kind of a military approach to the taking over of the town. It's really, really harsh, and the criticism has been that it's been too graphic, but I think that's appropriate for this film, you've got to scare the s— out of people. You cannot do a PG-rated *Resident Evil* film; it will not work.

It sounds like you're really passionate about this stuff.

Oh yeah. I always try to put gaming off because once I start playing, I play until six in the morning, and then have to be at work at seven. I really started to get hooked on it with PlayStation. I mean, I loved *Street Fighter 2* on the Super Nintendo, but I didn't become a fanatic until I got a PlayStation.

Are there any games that you like to play, even though you just suck at them?

I am really into basketball games, I love basketball games, but I just haven't mastered them yet.

Do you ever go down to an arcade and start crunching the quarters?

Oh yeah, especially when I'm on location in some remote place. When we were filming *Knockaround Guys*, me, Barry Pepper, and Seth Green were all playing these games in this arcade-slash-bar. And we really gravitated towards this snowboarding game. We played so much we'd start sweating.

And while we were shooting *Saving Private Ryan*, what we would do is go down to the arcade and play *Tekken 3*. It would be me, Ed Burns, Matt Damon, Barry Pepper, and Dylan Bruno, and I would beat the s— out of everybody, though I don't know if that's something to be proud of....

Did Tom Hanks or Steven Spielberg ever come with you?

Tom Hanks couldn't come, and I was trying to convince Steven Spielberg

to get a *Tekken 3* on location, but it never panned out.

What about some of the other guys you've been in movies with, guys like Ben Affleck or Jamie Kennedy? Have you gotten to play games with them?

Funny story. I went over to play poker at Jamie's house once, and I did the wrong thing: I put *Resident Evil* on. He had never played, I was teaching him how to play, and I didn't get off the thing for five hours. Five hours just evaporated. They were playing poker, and I just couldn't get off it.

So who's the best video game player that you know?

Next to me? Cole Hauser, not even a question. He annihilates me in *GoldenEye 007*. He destroys me at all Nintendo games. But PlayStation games? I make him wish he never woke up.

And lastly, have you ever gotten into trouble while filming a movie because you were busy playing games?

Not yet. But I will. **E**

When Columns Collide

Since the first issue of *incite*, The Rock and D'Lo Brown have been trading insults and talking trash. They both think they're the best video game player in the WWF, so we gave them the chance to prove it. Jon Robinson played referee as the two superstars exchanged jabs at *Knockout Kings 2000* on the PlayStation.

The WWF video game challenge was the talk of the locker room before a recent event at Madison Square Garden in New York. Here are some of the predictions and challenges from various superstars, along with a disturbing picture of Al Snow playing *WWF Smackdown* against closet gamer Head.

Matt Hardy: I've got to go with The Rock. He is The People's Champ.

Jeff Hardy: I always smell what he's cooking, so I'll have to go with The Rock, too.

Al Snow: I hope The Rock gets knocked out. If D'Lo can't do it, I'll do it myself!

Chris Jericho: I would have to say that D'Lo Brown is going to win because he plays video games all the time while The Rock is so busy being The People's Champion, he probably doesn't have time to be The People's Video Game player as well. I'll put my money on D'Lo.

Christian: It doesn't matter who wins because I can beat both of them. I've beaten D'Lo in *Knockout Kings* before, so I'm sure I can do it again. In fact, I officially challenge the winner to a video game battle in a future issue. I think I can take either of them!

TALE OF THE TAPE

The Rock

Height: 6'5" (13'8" when standing atop the People's Ladder)

Weight: 275 lbs. (1,175 lbs. when carrying The Nation on his back)

Reach: 84" (106" when laying the smack down with a steel chair)

Finishing moves: Rock Bottom/People's Elbow Crowd goes crazy for the elbow pads.

New move should be: A variation of the Boston Crab called The Rock Lobster

"Finally, The Rock has come back to The People's Magazine. The Rock's magazine, *incite* magazine and The Rock says this: I'm going to have D'Lo's roody-poooh candy ass running out of here screaming, "No más, no más!" in a really high-pitched female voice. No offense to all of The Rock's female fans. If you smell what The Rock is cooking!"

D'Lo Brown

Height: 6'3" (11'5" when standing on the top rope waiting to pounce on an opponent)

Weight: 268 lbs. (668 lbs. when power bombing Sexual Chocolate)

Reach: 77" (87" when using a phone with a 10" cord to dial 1-800 Collect)

Finishing moves: Sky High/Lo Down Huge pop when D'Lo climbs the turnbuckle.

New move should be: A kick to the nuts called The Lo Blow (see rounds 1 and 2)

"I finally got The Rock in one place to put his butt in front of a video game and I'm going to make him recognize just who the hell I am! I'm going to knock him out and prove to everyone that I'm the greatest video game player of all time. People's Champ? Huh, I'll make him look more like the People's Champ! That's all I have to say about that."

Photography by Tom Hopkins

"I finally got The Rock in one place to put his butt in front of a video game and I'm going to make him recognize just who the hell I am!"

"How are The People's Nuts feeling now?"

Round 1

Before the fight, both wrestlers decide to play as the original Great One, Muhammad Ali. The bell rings and The Rock's Ali catches D'Lo off guard with a flurry of jabs followed by a hook that sends D'Lo's Ali reeling. As D'Lo backs up, The Rock shouts, "The Rock says I'm kicking your ass!" D'Lo quickly regains his composure, however, grabs The Rock's Ali, headbutts him, then delivers three low blows. "How are The People's Nuts feeling now?" D'Lo yells as round one ends.

Comments

D'Lo Brown: "I'm putting his ass down in the second round!"

The Rock: "D'Lo needs to let go of The Great One and stop cheating."

Round 2

As The Rock's Ali charges D'Lo's Ali, D'Lo rares back and kicks The Rock's boxer in the jewels. "How are your cock and balls, Rock?" D'Lo says as he follows up his low blows with a combo to the body. "D'Lo's like school in summer," The Rock says, "no class." What happens next, though, is like something straight from *Monday Night Raw*. D'Lo's Ali connects with three jabs followed by a hammering cross to The Rock's Ali's head, spinning The Great One's Great One down to the

canvas. As The Rock's Ali gets up, he starts throwing wild haymakers, and D'Lo stands up to talk smack. The Rock, seeing this, throws down his controller and tries to push D'Lo. The Rock then goes for what looks like a foot stomp, but instead of hitting D'Lo's foot, D'Lo moves, one of them smashes the PlayStation, and the game turns off.

Post-match Mayhem

The Rock: "What happened was real simple: The Rock went in there, and I was whipping his ass all around the arena, The Rock's arena, Madison Square Garden where we stand right now. The Rock was just about to knock D'Lo's ass out and he kicked the open button. It's just like when you used to play the old Nintendo and you'd lift the lid up and the game would turn off.... The Great One leaves the building."

D'Lo Brown: "Finally The Rock goes down to the best damn video game player on the planet. *incite*, all my boys out there, J-Dog, you saw what happened! I took The Great One down with the real Great One, Muhammad Ali. I went up there with my special jab-jab-jab, then all of a sudden The Rock was crying, 'I'm laying on my back, I'm not used to being on my back!' And then somehow the PlayStation lid popped open. How'd that happen?!"

SO WHAT DO THE JUDGES THINK?

D'Lo Brown wins by disqualification, but nothing was really settled between the two video game rivals. Did The Rock mean to kick D'Lo or was he aiming for the PlayStation all along? Will The Rock or D'Lo ever be able to get a clean win without the other turning the machine off? How will wrestlers like Christian and Edge play in upcoming battles? Stay tuned to future issues of *incite* for WWF Battle #2 and the answers (hopefully) to all of these questions. But for now, can anyone help fix our PlayStation?

**SAN FRANCISCO
GAMESCON**

Overwhelm your senses in the Exhibition Area

See the newest hardware, see the latest games, and then meet the people who make them in the exhibition area. Over 60,000 square feet of gaming magic, presented by publishers and manufacturers from the Video and PC gaming world.

Play today's hottest new titles on the latest hardware and peripherals in The Gaming Arena

The Gaming Arena is comprised of hundreds of PCs that are configured with the most current gaming devices - video cards, audio cards, speakers, and interface devices. Test drive your favorite PC game using the hottest hardware out there.

Conquer one of our celebrity "Gods of Gaming" for eternal bragging rights

Play a PC or Video game against a celebrity from the gaming industry. We have invited several celebrity "Game Gods" to challenge our attendees to a game of their choice. Here's the catch: the celebrity developers cannot choose any game they have created, but rather a game they love to play. And your catch: you will have to win the right to play by way of a lottery held at www.gamescon.com. Make sure you register for your chance to win.

Participate in the Roundtables

Hear the movers and shakers from the gaming industry talk about what they love most. Don't miss out on any of the roundtable talks that will be occurring throughout the two days. This is your chance to listen to the great ones and interact with them in a casual and informative environment.

"When I was a gamer 19 years ago I used to wait with eager anticipation for the ZX-Microfair each year in London, England. It was the only time 1,000's of real gamers could get together to talk about, buy and play the latest games. Somehow shows like that disappeared and now we just have shows where only people working in the business are welcome. Security at the doors actually keeps the gamers away from seeing the new games! It's great to finally be a part of conference that welcomes GAMERS and a conference you can all take part in."

FEBRUARY 19-20 2000

It's nut up or shut up time for **WWF Smackdown**, and THQ answers with the testicular fortitude of a champ. The game's not just electrifying, it's revolutionary, and it might just be the title that changes wrestling video games forever....

LORDS OF THE RING

WRITTEN BY JON ROBINSON
PHOTOGRAPHY BY TOM HOPKINS

The World Wrestling Federation scares people. Maybe it's the fact that its notorious owner and ringmaster, Vince McMahon, recently dove off a 20 foot tower and crash landed through a pile of sandbags in a main event "hardcore" battle that left the 53 year-old multi-millionaire broken, bruised, and bloodied. Maybe it's the fact that on that same pay-per-view, a female valet named Miss Kitty flashed her "kittens" during a woman's title match where the winner needed to strip off their opponent's evening gown. Or maybe it's the fact that in the month of November, the same scandalous and shocking WWF had the number one New York Times Best Seller book, a CD in Billboard's top 10, and the most watched program on cable television. And you know what? This should scare people and it will continue to scare them, because the WWF's blitz on the world of home entertainment shows no signs of slowing down.

In fact, every week the WWF's male soap opera of betrayals and beat downs seems to build more and more momentum with their ever-growing legions of fanatical followers. An extreme *Days of our Lives*, the company at its root produces scenes reminiscent of some traveling Vaudeville show or master magician's theater, catering to what the stereotypical male most wants to watch—bawdy babes, brawls, and barbarism ("bang, bang!"). Take a look at the WWF's next generation of superstars. The Rock, Edge, Christian, The Hardy Boys, Y2J—not only are all of these wrestlers unbelievable athletes and remarkable artists of anarchy, they're all still in their 20s, and they're becoming some of the most recognizable and revered sports figures in the world (The Rock was even voted *People Magazine's* Sexiest Wrestler). So anyone who thinks the WWF's popularity is just going to peter out like some ridiculous trend (think fluorescent shoelaces) must be smoking one of

People might scoff at that last statement, but if you're trying to put wrestling down without witnessing an episode of *Monday Night Raw* or *WWF Smackdown*, then you have no idea what you're missing. WWF programming hooks its audience to a point where regular viewers become obsessed about what's going to happen next to their favorite characters. And that's what people who don't watch the show fail to understand. It's not just about who jumped off the roof of the steel

Outrageous? Yes. Over the top? Definitely. Entertaining? Oh, hell yeah.

And the WWF will continue to entertain its fans

with more than just the usual television and pay-per-view spectacles, but with toys, CD's, books, and video games. In fact, every video game they release shoots straight to number one, and their last game, *WWF Wrestlemania 2000*, was the most intense interactive wrestling experience ever seen. How will they top that? By doing what the WWF does best—taking something exciting and unthinkable, then going even further with the idea until their fans are left addicted, in awe, and in need of another hit. *WWF Smackdown* promises to deliver all three by not just giving wrestling fans an update of a previous WWF video game, but by adding innova-

Smackdown Dream Matches

Before the WWF, both Steve Austin and The Rock were famous names. How do the WWF superstars stack up against the originals?

Dream Match 1:

STEVE AUSTIN VS. STEVE AUSTIN

Before "Stone Cold" the name Steve Austin belonged to one man, the Six Million Dollar Man to be exact. Now the bionic wonder is back to challenge the rattlesnake to an all out brawl for the rights to be called Steve Austin.

'Stone Cold' Steve Austin

AGE: 34 years old
HEIGHT: 6'1"
WEIGHT: 240 lbs.

'The Six Million Dollar Man'

AGE: 60 years old
HEIGHT: 6'
WEIGHT: 2 Twinkies from 300 lbs.

Dream Match 2:

THE ROCK VS. THE ROCK

The People's Champ battles the most hardcore prison on the planet. Which Rock will survive.... Who will get smashed to pebbles.... Can the People's Eyebrow survive the frostbitten winds of San Francisco?

'The Great One' The Rock

AGE: 27 years old
HEIGHT: 6'5"
WEIGHT: 275 lbs.

Alcatraz aka 'The Rock'

AGE: 65 years old
WIDTH: 336 cells
WEIGHT: 1545 prisoners

Tag team partner: Stone Cold trusts no one
Most hated opponent: Vince McMahon
Trademark Move: Stone Cold Stunner

Quote: No matter how much better, stronger, or faster, Austin 3:16 means I just whooped your six million dollar ass!

Tag team partner: The Bionic Woman
Most hated opponent: Big Foot
Trademark Moves: 6 Million Dollar Dream, Bionic Eye Gouge
Before he was money: Played a cowboy named Heath on *The Big Valley*
Quote: We can rebuild him. We have the technology. We have the capability to make the world's first Bionic man. Steve Austin will be that man. Better than he was before. Better... stronger... faster.

Tag team partner: Mankind (Rock & Sock Connection)
Most hated opponent: HHH
Trademark Moves: Rock Bottom, The People's Elbow
Before he was hard: Crowd chanted "Rocky Sucks!"
Quote: I'm going to grab your entire cell block, lube it up real nice with all that soap you keep dropping, turn that son of a bitch sideways, and shove it straight up your candy ass!

Tag team partners: Al Capone, Machine Gun Kelly, The Birdman
Most hated opponent: Clint Eastwood
Trademark move: Gas Chamber
Before it had bars: Alcatraz Island was a military fortress

Smart Marks Don't Drink Juice

Ever heard some wrestling fans talk and thought they were speaking another language? The Big Bossman's here to drop some wrestling knowledge and fill you in on some of the most common "insider" terms of the business.

Baby Face: A good guy that the people want to cheer. As soon as their music hits, the crowd knows who's coming out to the ring, and they start to go wild before the wrestler even walks through the curtains.

Heel: A bad guy like The Big Bossman...enough said.

Jobber: Years and years ago, it's what they called all wrestlers. Today we call wrestlers talent. Another definition is a wrestler who's sole purpose is to put his opponent "over" with the crowd by losing badly and, sometimes, quite quickly.

Juice: When wrestlers bleed during a match, we call the blood "juice."

Mark: I don't like the term mark. It used to be a term for someone in the crowd who believed what they were seeing was 100 percent real. Today, I like using the word fan. A fan is loyal to us no matter what. We get our heads knocked around out there for real, and that's why I don't like the term mark, because it implies what we're doing is fake.

Over: Being over means getting a reaction from the crowd by giving them the entertainment they want. The Rock and Steve Austin are over because the crowd cheers their every move. The Big Bossman is over because they hate me for tormenting the poor Big Show and his family.

Smart: A person who knows what's going on in the industry. Understanding the business end of wrestling and not just the entertainment factor.

Working snug: Making the moves look as real and painful as possible. Working snug is extremely dangerous because this is how most people get injured, by going too far. When you're on TV as often as we are, there's a lot of pressure to perform, and that's when accidents happen.

GOING DOWNSTAIRS Shane and Stephanie shouldn't expect any more siblings.

THREE'S A CROWD Recreate classic tag team rivalries from the past.

They even have all of the backstage scenarios...next thing you know you'll be able to conduct interviews," said one of the federations newest heroes, Christian. "The lines are starting to get blurred between playing a *Smackdown* season and reality."

Outside of Season mode, the game also sports some extremely wild backstage brouhaha's reminiscent of EA's title, *WCW Mayhem*. If you and your opponent are fighting outside the ring, you can both run up the ramp and exit the ringside area through the curtains underneath the Titantron. You and your adversary will then be transported into a hallway where you will see a few different doors that you can enter. By throwing each other through the various doors, your fracas will be carried over to a number of famous WWF backstage locations, from the garage to the dreaded boiler room—each locale providing plenty of weapons at your disposal including chairs, guitars, and caskets..

Other highlights include *Smackdown's* striking list of match modes and options. Gamers can compete in Singles, Tag Team, Royal Rumble, Survivor Series, Battle Royal, Handicap, Steel Cage, King of the Ring, Hardcore, Falls Count Anywhere, Survival, I Quit, and Special Referee matches while wrestling as one of 30 top grapplers from the WWF, including The Rock and Kane. Or, if you're tired of playing as the WWF icons, you can simply create your own fighters in one of the most in-

"With each game, THQ keeps getting closer and closer to delivering exactly what we do on TV. Now they even have the backstage scenarios."

depth create-a-wrestler modes seen to date. Not only can you adjust the heights and weights of your new wrestlers, but you can actually adjust their logic and how they will react to certain moves in the game. Another frightening but hilarious aspect of the wrestler creator is the mode's ability to take different parts from your favorite WWF superstars and make one seriously mutated muscleman...you can even give The Undertaker a voluptuous pair of "puppies" and a dress. Wrestler Al Snow has some ideas of his own, however, when it comes to creating wrestlers: "I want to create a thin Mankind," said Snow. "Lord knows you need a video game to do that because the real Mankind will never be thin again. He's more pear shape than thin."

But features aren't everything (are you listening, Acclaim?), and *WWF Smackdown* lays, well, the smack down with accelerated motions, frenzied gameplay, and all the spectacularly demented and daring moves of your favorite showmen. The grappling system screams similarities to *WWF Wrestlemania 2000*'s, only with a few tweaks. For example: instead of an Attitude meter, there's a Smackdown meter that lights up when it's time to drop The People's Elbow. What's different, though, is how you build up that meter. The timing of finishing moves has been adjusted to include more of how your wrestler and opponent are feeling at that specific time in the match, and not just how often your character taunts the crowd to build up his power bar.

The gameplay also features more double team moves than any other WWF game, and should include team specific moves like the Dudley Death-Drop. Additionally, you can reverse or counter almost any move; then there are the reversals that reverse the reversals, and the counters to counter the counters, and the reversals to counter the...never mind, you get the point. But some matches might actually flaunt sequences where Chyna grabs Edge in a lock-up, Edge flips out and slams Chyna to the mat, Chyna gets up and attempts to blast Edge in the balls with an uppercut, but instead gets drop kicked in the teeth by a pair of flying feet.

It's back-and-forth pandemonium like this, combined with the soap opera aspects of the Story mode, that make *WWF Smackdown* so alarmingly close to playing an episode of the TV show, it's frightening... frighteningly entertaining, that is. It's also probably the closest you'll get to Chyna touching your balls. **i**

No Holds Barred

Take your fights backstage in *WWF Smackdown*, in areas such as the kitchen, garage, locker room, and the boiler room. Feel free to use any item you can find to pummel your opponent with. Now you can recreate some of the WWF's ultimate backstage brawls.

Pay-per-view Madness AL SNOW VS. THE BIG BOSSMAN

The Big Bossman cooked Al Snow's pet dog then fed it to him for dinner. How did Snow seek revenge? By beating the bacon out of the former pig all over the arena. They took it to the streets, they fought inside a bar—these two hardcore fighters defied pain with every move!

Super Bowl Surprise THE ROCK VS. MANKIND

Last year, the WWF staged a Super Bowl halftime show of their own that featured Mankind against The Rock for the WWF championship. The fight went all over the arena, from the stands to the kitchen before Mankind finally pinned The Rock...with a little help from a handy forklift.

Monday Night Raw KEN SHAMROCK VS. STEVE BLACKMAN

This was one feud that got ugly, and we're not even talking about Blackman's mic skills. The two combatants slugged it out in the garage on multiple occasions and even raced cars at each other as weapons. While you can't drive in *Smackdown*, you can still wallop your opponent with a shovel.

A full-page photograph of Chris Jericho in a wrestling ring. He has long blonde hair and a beard, wearing a shiny purple and black wrestling singlet. He is leaning over the red ropes of the ring, looking directly at the camera with a serious expression. The background is dark with some out-of-focus lights.

Jerichoholics anonymous

From the moment **Chris Jericho** debuted in the WWF, he's been more than just a superstar, he's been a sensation. Jon Robinson sat ringside with Y2J and before long was left muttering the words, "My name is Jon, and I'm a Jerichoholic."

First off, you're supposed to be a bad guy, but every time you hit the ring the crowd goes nuts. What's the deal?

In all honesty, the way wrestling has mutated now, popularity has less to do with wrestling skills and more to do with personality, storyline, and the way you interact and connect with the fans. I think the Y2J character does that because he's entertaining, but he's also an idiot in a lot of ways. Also, inside the ring, I can balance what the audience wants to see – the flash, the pomp and circumstance, the music, the lights, the comedy, the athleticism. There are only a handful of guys that can provide all of those things, and I like to think that I'm one of them, or hope that I will be one day soon.

Plus, people know that I'm having fun while I'm out there, which makes a big difference. When I was a kid, I used to go watch a lot of different bands in concert. When I'd see Metallica, it looked like they were having a good time on stage, laughing, playing, and running around. On the other hand, while I was always a big fan of Aerosmith, I hated to see them in concert because all they ever did was stand there and play. I would much rather pay to see a band that looked like they were having fun, and people feel the same way about wrestling. If you're having a good time, it permeates into the crowd. I've been a so-called bad guy the last two years, but now the fans, people I call Jerichoholics, are cheering for me, but it's not by anything I've changed in my style. It's just that people enjoy the character, and entertainment is the most important thing.

What does it take to be a Jerichoholic?

It just takes the pure belief that Y2J is the hero and role model and idol to the millions of Jerichoholics worldwide. Admit that to yourself, and you're all the way there.

Now, before you were admitting Jerichoholics into the WWF you were in WCW. What are the differences between the two companies?

The WWF is just much more of an organized place, and working here you feel like a true superstar because that's the way you're treated and that's the whole attitude of the company. The WWF is the number one wrestling organization in the world and it shows. It's just a much better place for younger wrestlers to be, and it's the place where people really make a name for themselves in the business.

Today you're wrestling in Madison Square Garden. Does the arena hold any special meaning for you? It's always been a dream of mine to wrestle in Madison Square Garden. My father used to play for the New York Rangers, so

I grew up in New York, and I've been coming to this arena since I was three years old. It's fun to actually be here myself and entertain the thousands in attendance just like my father did when he played hockey. It's like a circle has been closed in my family.

Where is the strangest place that you've ever wrestled?

Wow, I wrestled at a kid's birthday party once. It was in a barn and he had five or six friends and his mother there, and I think I got paid a glass of orange juice and a hot dog. That's probably the strangest circumstance surrounding any of my matches.

How did you become a professional wrestler?

I was always a big fan of it as a kid. Growing up, I used to watch the old AWA, Stampede Wrestling, and the WWF. The sport just captured my imagination, and when I was around age 15, I decided that that's what I wanted to do with my life.

What jobs did you have before you were a wrestler?

I worked at a pizza place for about two weeks – my job was to put sauce on the pizza crusts and to scrape off the pans that the pizzas were cooked on. I got covered in charcoal a couple of times and it really sucked. I spent most of my time there trying to think of ways to get out of scraping those pans. I also worked at a deli that was downstairs from an old folk's apartment building. I had really long hair and all of the old guys used to come in and think that I was a girl. They'd be like, "Excuse me ma'am, could I have some bologna?" And I'd be like, "Sure you can have some bologna, but I'm not a ma'am!" Thankfully, I've been working as a wrestler the last nine years straight.

Do you enjoy playing the wrestling video games?

I love playing video games; unfortunately with my schedule I don't get to play as much as I like. When the first game I was in came out, *WCW Nitro*, I went out and bought a PlayStation just to play as myself in the game, but I couldn't figure out how to do anything. I think I got beat by Chris Benoit in three seconds. The screen said something like "Benoit DESTROYS Jericho!" and I was like,

wow, now there's something new, because at that time, getting destroyed was about all that was happening to my character.

How does it feel to see yourself in a video game? It's cool. I've always wanted to be in a video game and on a trading card. Those are both things that people can never take away from you and that you'll have forever, so they're both very special to me. These games are getting so high-tech that pretty soon you'll press power on the PlayStation and I'll appear in your house and wrestle like I did for that kid in his barn. Better get my juice and hot dog ready!

How do you think your character looks in the new game *WWF Smackdown*?

It looks good, but it'll be difficult for the video games to keep up to date because I'm constantly changing my hair and my outfits. But every time I see a new game, I'm shocked because the animations and the level of detail just keep getting better and better. Now the games even have my ponytails and my ring entrance – it's scary how close to reality they're getting. The other day, THQ did some laser scans of my face for a future game, and after

they did the scans, I saw my face on the computer, and it was a very strange, surreal type of experience.

Have you ever been inspired to perform a move you saw in a video game in real life?

Maybe five or six years ago, when I was more into doing crazy moves I would've tried to steal stuff from the games. But, believe it or not, I did steal a bunch of moves from the *Teenage Mutant Ninja Turtles* movie. In fact, I stole something from that movie that I still use all the time. But when it comes to the video games, although there's a lot of stuff I'd like to try, I'm just not as agile as I used to be.

***Smackdown* lets you create wrestlers to play as or fight against in the ring. Whom do you want to create?**

I'd like to create a Dynamite Kid character. When I was in Japan, there was a game called *Fire Pro Wrestling* and you could create wrestlers, so I created The Dynamite Kid and Chris Benoit to fight each other because they're different generations of the same style. In *Smackdown*, it'll be fun to

"Today, games aren't just about the bashing and trash-ing inside the ring, but the whole male soap opera that is the WWF."

create an Arnold Schwarzenegger character. I think my favorite, though, will be to create Jennifer Aniston so Y2J can roll around with her for a bit.

Smackdown also features a lot of backstage brawls. What's the craziest thing that has happened to you backstage?

In the confines of the show, crazy stuff happens all of the time. I beat people up, run after them and attack them, I even hit Chyna with a hammer. Probably my favorite thing that I did backstage is something that I stole from *Spinal Tap*. I was wrestling in WCW and I was supposed to have a match against Wrath. I was imitating Goldberg's entrance, only I had a bunch of fat old bald guys surrounding me as my security and instead of walking to the ring, I made a wrong turn and got locked outside the building. That's one of my favorites. As far as other crazy things that happen backstage, one time I couldn't find the coffee machine and I started freaking out because I was missing my caffeine, but that's as crazy as it gets.

Speaking of fat security guards, what happened to Ralphus?

Before he was my bodyguard, he was just some guy who used to drive the lights around for WCW, and after a while the joke got stale. You can't really have a guy like that around you too long or the humor gets old. So I guess he's back to setting up lights.

Can fans expect to see a feud between Y2J and The Rock in the near future?

Definitely. We already have a little bit of a back-story there, and his character is similar to mine in a lot of ways. I don't think anyone can really talk as good as he can...well maybe not anyone. There are a few who can keep up, and I think that I'm one of them. So I know we can have some really good verbal duels, and I think we can have some dynamite duels inside the ring as well. *[In walks D'Lo Brown]* But enough of The Rock, because I want to be just like D'Lo Brown...a bald, fat, black guy. *[D'Lo leaves laughing]*

What hobbies do you have outside of wrestling?

Music, hockey, my girlfriend, going to church. I don't really get a lot of time off, so when I'm home I just like to relax.

Are there any moves that you've been working on but haven't tried in the ring?

There might be a few new moves that I'll try here and there, but my days of inventing moves are pretty much over with. Today, it's not really what moves you do, but how you do them. Someone could do a triple moonsault off the top of a cage and it might not get the same pop as a punch from The Rock. If you know how to do

"It's not really what moves you do, but how you do them. Someone could do a triple moonsault off the top of a cage and it might not get the same pop as a punch from The Rock."

Austin. Steve does about a quarter of the moves that Papi does, but Austin's a million times more popular because he knows exactly when to do the things that he does best. When you've been in the business for a while, you realize that it's not what you do, it's when you do it and how you do it. So that's more of what I'm trying to work on now rather than trying to think of new flips.

How close to reality do you think a video game

things right, that's what people are more interested in seeing rather than witnessing something extreme. A lot of wrestlers don't understand that you can do all the acrobatic moves in the world, but it really doesn't matter when it comes to crowd reaction. Look at the differences between Papi Chulo and Steve

can get to what the WWF provides its fans?

The systems are just getting so much more high-tech, especially when compared to when I first started getting into video games. Back in 1981, I remember when Atari and Intelelevision were cutting edge. Then ColecoVision came out and that was the cat's ass. Now they have 3D graphics and popular bands doing the soundtracks. What's great about *Smackdown*, though, are all of the backstage choices you get to make - it's almost like a WWF Choose Your Own Adventure book, where depending on your decisions, the storylines actually change. Today, games aren't just about the bashing and trashing inside the ring, but the whole male soap opera that is the WWF. Pretty soon they'll probably have virtual reality where you're actually in the match wrestling against me in your living room. We'll do weddings, parties, and bar mitzvahs.

Anything else Y2J wants to say to his fans?

Keep buying the video games and keep playing as me. I'd much rather have you guys playing with me because I'm tired of playing with myself...in the video game, that is. **E**

"It just takes the pure belief that Y2J is the hero and role model and idol to the millions of Jerichoholics worldwide. Admit that to yourself, and you're all the way there."

BATTLE OF THE BANDS

You always know it's the holiday season when your favorite TV shows do Christmas episodes and then go into weeks of repeats. You always know it's the holiday season when your favorite stores cover their displays with fake snow, even though you live in

MACHINE HEAD

Wondering which of your favorite bands are the best drivers? We were too, so we challenged members of **Blink 182**, **311**, **Bush**, and **Filter** to a battle royale on *Test Drive 6*. Paul Semel fastens his seat belt.

Los Angeles and the only snow the city ever sees is the kind that'll get you 3-5 for possession. And you always know it's the holiday season when your favorite bands play together at benefit concerts thrown by your favorite radio stations.

Which is why when San Francisco's Live 105 radio station announced their "Not So Silent Night" show, featuring performances by Bush, Filter, 311, and Blink 182, we knew the holiday sea-

son was upon us. And feeling that holiday cheer, we not only decided to help out by co-sponsoring the show, but also decided to give you, our loyal readers, a bit of a treat by challenging the bands to play each other in a couple races of *Test Drive 6* for your amusement. Whoever got the fastest lap time would be our winner, giving him the right to brag from now until no one cared anymore. As for us, we'd run the story in our March issue, well after that holiday cheer had subsided into a longing for summer, and get all nostalgic for our holiday bout of road raging.

Battle 1 Mark from **Blink 182**

For the first race, we set up in the back of Blink 182's dressing room. Mark ran to the couch, announcing "I'll kick the s— out of the Filter guys," adding "I don't know any of the other guys. But I'll kick the s— out of Bush for sure."

Brave words (and ironic considering his lap times), but made more in jest than in rock star bravado. "I'm not doing this for competition's sake," he explained as he crashed into a wall again, "I just like playing video games. It comes from having no loving and no one to spend time with."

Despite his experience, though, Mark seemed to have

a bit of difficulty with the course (London, for those of you who keep track of such things). When not bumping into the wall, he was knocking into other cars, often sending them into the air. "See that move?" he asked after a particularly wily maneuver, "I'm like Bill Murray in *The Spy Who Knew Too Little*."

Mark was stopped by the police in all the races and cited for speeding, reckless driving, and resisting arrest. It wasn't the money that bothered Mark as much as losing valuable seconds. "It's another instance," he said, sighing, "of The Man trying to keep me down."

"I don't know any of the other guys. But I'll kick the s— out of Bush for sure."

Battle 2 S.A. from **311**

"I would have smoked my other time if I hadn't gotten stuck behind that pole."

For the second round, we moved the set-up to 311's dressing room, just in case S.A.'s pals could cheer him on. Not that S.A. would've noticed; his concentration was entirely on winning the game. Though he would utter an "Oh God" when he'd crash into another car — which, to be honest, happened quite frequently — for most of his three races the singer was rather quiet.

Instead, his concentration stayed on the TV. The only time he seemed the least bit distracted, in fact, was when Mark came in and asked, "How's it going for me?" Hear-

ing that his best time had been beaten, though, the Blink 182 singer was a little disappointed, but not much. "S.A. and I are friends from way back in the Warped Tour days," he explained, "so if he wins it's like we all win."

By the third race, however, S.A. had loosened up, becoming more accustomed to both the course and car. This would be his undoing, as he soon found himself caught between a pole and another car, which wasted valuable seconds. "I would've smoked my other time," he said later, "if I hadn't gotten stuck behind that pole."

Battle 3 Dave from *Bush*

Though all of our drivers wanted to win, no one was favored to win more than Dave. Being from England, it was thought that he might have an advantage over the other drivers on the London course. After all, it was Mark who had noted, "It's uncanny how these streets look like the streets of London."

However, it was Dave himself who dismissed this thinking when he pointed out that the course didn't actually resemble Britain's big city. "No, not at all," he noted, "It looks

more like Paris."

Still, it seemed like Dave might still have an advantage over his competitors, as he revealed that he'd spent his valuable lounging around time playing *Test Drive 6* downstairs, where the game's creators, Infogrames, had a booth set up for people to play. This time was well spent, as Dave didn't suffer the acclimation time of Mark or S.A., getting closer and closer to the latter's best time with each race until he finally beat it in the third race.

"London? No, not at all, it looks more like Paris."

"I'm driving like a drunk driver. This is like a demolition derby."

Battle 4 Geno from *Filter*

Whether driven by his innate competitive nature or the idea that if he lost he'd never hear the end of it from the band, Geno seemed so determined to win this showdown that he was often heard yelling at the other cars on the road who, obviously, don't exist. And though his driver's license was currently expired, it took just one race for him to beat the best time, prompting the gleeful declaration, "I won!"

Ironically, though, his next race had him crashing and bashing everything in sight, forcing him to admit, "I'm driving like a drunk driver. This is like a demolition derby." Such

declarations didn't go unnoticed, however, and he soon met London's finest, who presented him with a ticket for speeding and resisting arrest.

Geno did do a bit better during the third race, though it was still not enough to beat his first go-round. Even so, he was still the winner, a fact that, when his bandmates and friends heard, inspired much cheering. Geno and Filter singer Richard Patrick even broke into an impromptu rendition of Queen's "We Are The Champions," though that only lasted about as long as it takes anyone to sing, "We are the champions, my friend."

After playing *Metal Gear Solid* through for the sixth time, I decided that it was time to stop just playing games and live the life. After all, what use is all this simulation, all this quality training I was receiving, if I never do anything with it? It was time to go out into the real world and show that I was not wasting my life away in front of my TV. Time to prove that I had been preparing in ways no one could ever dream of.

In *MGS*, you hone your sneaking skills in order to infiltrate an enemy base. One aspect of this sneaking technique is hiding inside a cardboard box and shuffling along the ground so that when guards look your way, they won't notice you and sound the alarm. Well, I'd gotten so good at this that not even a rent-a-cop on a few cans of Red Bull would've noticed me. I just slide on in and get the job done. Wham, bam, thank you, ma'am.

But like I said, it was time to live the life. While I have little need for sneaking into a high-security enemy base in Alaska, I also have little need for dealing with the bouncers and the high cover charge of the big club in our city, 1015. None of that "wait here while your female friends go in way ahead of you for free and we charge you \$10 for the privilege of walking in" stuff for me. I was taking the back route and going in, stealth-style. It was time for the box.

Boxing Clever

By Ed Lewis

Using **Metal Gear Solid** skills to bypass harsh nightclub security.

Your step-by-step guide to **Box Espionage**

1. Setting down the box.

First off, establish the box as a non-threatening item in your target environment. Set the box up and hide in it before the club sets up. No one suspects a cardboard box on the street. I live in a big city, and along with grocery bags, cardboard boxes are the tumbleweeds of the new millennium.

2. Sneaking past security.

When the place is going strong, beats are pumping from inside with a dull thud, and people are slowly going in, make your move. Crawl along when the bouncers aren't looking and they won't suspect a thing. For God's sake, remember to punch in an eye-hole *before* you start moving.

3. Sneaking through the entrance.

This part is tricky and requires razor-sharp reflexes and precise timing. Fortunately, I have a good bit of both. I also had a couple of female friends who were able to distract the hand stamper as I went in. For bonus style points, I even got the stamper to absentmindedly stamp my hand. Smooooove.

4. Success! At the bar.

All right, once you're inside it's all clear. With the colored lights down low and weeble-wobble club kids bouncing around, blending in is a cinch. Ditch the box next to the bar and carry it out with you later (no one suspects a guy carrying a cardboard box). The world is your oyster; go get it.

What's this **Metal Gear Solid** all about?

In the legendary game *Metal Gear Solid*, it's all about the sneakiness. If you're good, damn good, no one will ever see you. You sneak up behind guards and take them out while they're still thinking about what flavor of ramen they'll cook up at home. Sometimes you don't even want to kill anyone, you just want to sneak by without them ever knowing you were there.

If you haven't gotten your hands on *Metal Gear Solid* yet, then it's time to make a change for the better in your life. Drag your lazy ass over to the nearest toy store or web site and buy it. Last we checked, it was available for a mere \$20, which means you have no excuse for avoiding it.

ASK THE EXPERTS

Do some research on your target areas before you go in with your cardboard disguise. We called up a couple experts to see what they had to say:

PRIVATE INVESTIGATOR

Rat Dog Dick Detective Agency (415) 957-0220

Would you use a cardboard box in a stakeout?

Probably, but I would not move. I'd use it as stationary. A cardboard box wouldn't normally move. You wouldn't want to draw attention during surveillance. If you knew they wouldn't see you then sure.

What is the most effective tool of disguise?

A vehicle is most commonly used, such as a surveillance van or automobile. If you were in a bar, you could get very close.

So a cardboard box is really not useful?

Uh, no.

One last question: where'd you get your name?

I find people like a rat dog finds rats.

ESPIONAGE EXPERTS

Spy Shop (831) 375-2007

Is using a box a viable technique?

They may have tried, but it wouldn't work.

Are you sure? People can be pretty skilled with a cardboard box.

Technology today would catch this. There are temperature and motion sensors that work together to catch intruders. These sensors can detect a difference in temperature by as little as half a degree. Since these systems have been common for the past nine years, it's unlikely a box will get you anywhere.

So having a security guard watching the place is pretty useless, then?

Well, security still helps in order to catch the person once they're detected, but their job is not so much to personally watch out for intruders.

So, what if I was able to have a suit that would hide my body heat and move in the box in such incredibly small increments that not even a motion sensor could see me?

People have also been using pressure sensitive sensors under floors for seven years or so. You'll either starve to death from moving so slowly or set off an alarm and be caught in your box.

NIGHTCLUB SECURITY

1015 Folsom - Event info: (415) 431-1200

Has anyone ever snuck into the club in a box?

No.

Are you sure? Maybe they're too good.

We have 25 security guys and no one's getting in unnoticed.

What do you do if you catch people sneaking in?

Throw them out, take a picture, and make sure they never get in again.

No Guts, no Gory

With more guts than a Jimmy Dean slaughterhouse, *Berserk* gets medieval – hack and slash style

■ SYSTEM Dreamcast ■ PUBLISHER TBA ■ DEVELOPER Yukes ■ THEME Hacking and slashing plague victims, bandits and knights ■ PLAYERS 1 ■ AVAILABLE Spring

INSIGHT

Q. What's there to do, apart from the slashing?

A. You can hack. Or rend. Or tear. But not much else. No locating of gold keys, and no experience points. Just fountains of blood spilling from mutated locals.

Q. So what's in those barrels?

A. OK, so there are items to collect, bombs to throw, and crossbows to fire, but this really gets in the way of the slashing.

Q. Why is there a laser coming out of that guy's eye?

A. Well, when Guts (yes, that's his name) gets extra proficient in the slashing department, he starts seeing red – literally. Cue the “berserk” bloodlust and, you guessed it, more slashing.

If Tim Burton and David Lynch had a lovechild who went into the game designing profession, she'd create this. Then she'd keep adding arterial spray effects and maiming animations until she was asked politely to stop.

Stylized violence has never looked so impressive and graphic, while still retaining cartoon elements, as this romp into fantasy medieval Europe with the plague in full swing. Join the subtly entitled Guts, a rakish hero with one red eye and an itchy tattoo, as he matter-of-factly slices and skewers wave after shambling wave of organic mutations, ranging from small children with tentacles growing out of their skulls, to huge loping bears with human heads instead of snouts. Guts is on a jaunt to thwart an evil Baron named Balzac (no laughing at the back, there), a mus-

cular Balrog called Zodd, and the real power behind the throne, which after our extensive playtest seems to be a gigantic floating plant baby. With more tentacles.

Yes, sickeningly bizarre seems a little tame in describing *Berserk*. Only in this game can you slice in half a lumbering peasant dressed in Tudor garb with a gigantic meaty arm that ends in a sinewy ball of flesh. Upon closer inspection, this turns out to be his head, complete

with blinking eyes. And when that huge sword strikes, floods of blood gush about the feudal landscape, and combat intensifies as other, even more freakish townspeople lumber into your sword swings. Segued in with this constant carnage is a lengthy series of sometimes moving, always professional quality cut-scenes featuring mutated nuns, clanking knights, and a number of forest creatures covered in fleshy growths and fungal infec-

BESERKER BARRAGE Not enough flowing juices for you? Then wait until Guts really sees red – he becomes impervious to pain, and the blood flows like wine. Plague-ridden wine.

Dismemberment for the Masses

Classic Dismemberment Moment

With a name like Guts, career opportunities are bound to be limited. Luckily, *Berserk* came along and provided the perfect venue for our man Guts to hack-n-slash to his heart's content. Of course, with a sword that big, it's inevitable that the odd arm or leg might get sliced off now and again. In fact, it happens quite often – so often that we think the impressionable Guts might have been influenced by, say, a movie or TV as a young lad. What might it have been? We've got our theories. Like *Monty Python and the Holy Grail*, for example.

THEY MEET

A fun-filled day at the cinema for young Guts is about to take a chilling turn. On-screen, a chance encounter between two heavily armed men in a forest (along with a squire banging coconuts together). Happens every day. But this time, something goes wrong – horribly, horribly wrong.

'TIS BUT A SCRATCH

Oh no! The King of the Britons has brutally hacked off of the noble Black Knight's arm! Who could've seen that coming? Yet the Black Knight is unfazed, and is still able to trash talk. Shouts of, “Come on, ya pansy!” and, “Have at you!” ring through the darkened theater. Guts begins to take down notes.

'ARMLESS FUN In a wooded glen, Guts severs the main arteries of a vicious plant man consisting of three fused humans in a trunk like outer skin. With tentacles, of course.

tions. All of which you then kill in a shower of body parts. There's as much chance of *Berserk* receiving a Teen rating as there is of Cher getting carded.

But one has to admit that creeping buboes have never looked

so good. All manner of interesting skin conditions are present, from the pox to tentacles with baby heads growing out of them. And instead of gasping in impressed yet queasy horror at your adversaries, there's little time for looking, as a simple gameplay premise is at work here. You must tear and rend flesh as you dash from the start of an area to the end, with little rest in-between. This is *GoldenAxe* - H.R. Giger style.

With Eidos and Crave both vying for publishing rights, the beautiful massacre known as *Berserk* is set to bludgeon its way into stores shortly. When it does, we'll be there to mop up the entrails and carry out the definitive autopsy.

Three key moments of great grotesqueness

1. Mutation Nation

At the start of your quest, you'll meet a frightening mute girl known as Casca, a green pixie called Puck, and a gypsy going by the name Rita. No big freak-show and nothing to lose your sanity over, until the gypsies hit town and start performing for a crowd of villagers. After a spot of knife-throwing, Rita hands the stage over to the basin-headed Job. Clutching a mammoth mace, Job falls over, loses his hood, and reveals a baby's head stuck to his torso. The villagers welcome their less fortunate brother into the fold by stoning him. Then all heck breaks loose.

2. Going back to my roots

The harvesting of root vegetables in *Berserk* is not only frowned upon, but can be downright suicidal. Upon entering a plague village, Dumteth and his posse pause to admire a crop of turnips. But when one of his lackeys pulls the root out of the soil, the turnip deflates, lets out an ear-piercing scream, and triggers the whole town's mutations to kick in – as expected from the current crop of bewilderingly bizarre Japanese games. This spells the end of Dumteth (after a particularly nasty back-hand tentacle in the face) and the start of more bloody combat for you.

3. Potted Child Tentacles

Aside from organic mutations, sinewy flesh flapping about, and small children sporting twisted defects caused by the viral outbreak, what eccentric hack-'em-up could be complete without the staple diet of Japan's favorite appendage, the tentacle? Well, all you limb-lovers are in for a real treat, and one particularly unsettling cut-scene features *all* of the above occurrences. A mute girl enters a secret castle chamber, fishes out a squid child from a formaldehyde jar, and cradles it as it screams and grows purple tentacles. Stop now. You're scaring us.

HAD ENOUGH, EH?

Things have gone from bad to worse, and now the Black Knight is missing two very key limbs. How will he tie his shoes? Brush his teeth? Even worse, King Arthur seems quite willing to continue the carnage, despite the Black Knight's obviously compromised position. "Look, I'll have your leg," he menaces.

THREE DOWN

King Arthur makes good on this threat, slicing off another, very important, appendage. But the Black Knight is stoic in the face of adversity. His fallback career as a tightrope walker is obviously ruined, and yet the Black Knight presses on. "What are you going to do, bleed on me?" taunts the King.

COMPLETELY LEGLESS

The Black Knight is down, but not out. "Alright, we'll call it a draw," he concedes. The King takes advantage of the Black Knight's moment of weakness, and runs off like a yellow coward. How did this scene mold the fragile psyche of the young Guts? We may never quite know the full answer to that question.

My name is Claire. Since I awoke on this prison island, I've found it to be a real struggle for survival in today's zombie-eat-brains world. But I take it one day at a time, and I've found some surefire ways to make my stay intensely fulfilling without the undead getting me down. I let David Hodgson know about them.

REDFIELD OF DREAMS

PHOTOGRAPHS BY JOHN CASADO

DAY 1. LITTLE BLACK BOOK

A lot of the guys I meet seem to be dead from the neck up... and the neck down for that matter. They always try to engage me in heavy necking – which is fine if your jaw doesn't fall off in the heat of passion. I've learned to kick them to the curb and to respect myself. But there are three men in my life who've always seen me as more than just a piece of meat.

STEVE BURNSIDE

It's just nice to be around a guy who doesn't spend his free time shambling around cemeteries, even if that accent is Canadian. He saved my life. I owe him dinner at least.

CHRIS REDFIELD

Life without my brother, Chris, has been unbearable, but call it a woman's intuition, or a sixth sense, I'm sure I'll find him – or his blood-soaked corpse – soon.

ALFRED ASHFORD

One of Umbrella's founders is a closet cross-dresser, but he'll never get into my wardrobe. He doesn't have the Special Key, just a laser-sighted rifle. And big guns don't impress me.

DAY 2. DIETS THAT REALLY WORK

Before I joined S.T.A.R.S., I had a horrible self-image as a rookie cop. I felt overweight and didn't even have the strength to mash a stiletto heel into a zombie's head. I think it was during my first combat encounter, when I was encouraged by my teammate, Leon, to try an Umbrella-

developed all-herb diet, that my eating habits changed for the better. Three differently-colored plant extracts and a constant fear of being eaten alive have done wonders to my waistline. And when I'm fully adrenalized, even the blinding headaches and stomach pain brought on by lack of protein, carbohydrates, and dairy products...they completely disappear.

BREAKFAST

A nutritious double-green herb shake. If my horribly shrunken stomach starts to rumble at around eleven o'clock, I grab another. The effects are instantaneous. Then I try not to vomit.

LUNCH

I like to chop a few red herbs up into a small pile. Then I add

some crushed green herbs. After I relax, I get a real insight into my mission and life in general. Problem is, my motivation goes way down.

DINNER

As I'm always on the go, nothing peps me up after a zombie strangulation like a blue and green herb concoction. It even cauterizes, disinfects wounds, and realigns my neck for me.

DESSERT

If I've been physically mauled by the undead, I usually go for a quick Spray Can facial. Then I retire to my typewriter feeling invigorated. Sometimes I take another green herb. Just for medicinal purposes, y'know?

DAY 3. A WORKOUT THAT FEELS LIKE PLAY

Despite the dreary atmosphere, I've found some bloat-busting ways to keep my body slender. After all, a girl's got to stay flexible – it's all part of my daily workout regimen. I start by heading down to the storage depot for some neck-stretching exercises, courtesy of a playful Bander-snatch. Of course, he can play a little rough, which is why I accessorize with twin M-100P machine guns – and I plant a few ounces of steel-jacketed lead into him to

show I mean business. And when two Uzis aren't enough to get your heart rate up – or if I'm feeling a little less personal or flustered – I switch to my M79 grenade launcher. This can really keep your undead admirers at bay. You know, girls, nothing raises your spirits like being chased by a man who really wants you. Dead.

CLAIRE WITH M79 GRENADE LAUNCHER

I want to look my best, so I'm toying with the idea of augmentation — I'll have to ask my specialist Mr. Mikami — probably silicon, as I need plenty of it to push my polygons in all the right places. The outfit? I've chosen this conservative attire for my dinner date with Tyrant III. I don't want to create the wrong impression, so I included two Spas 12 shotguns to keep him guessing my intent. I've a strong hunch that this date aboard his personal jet won't be our last....

For a night on the town, I need to be dressed to kill at all times. Ever since I found my big silver Special Key to Code Veronica's closet, I've felt wonderfully free. With the right color coordination in my ensemble, I can knock them dead. Of course I'll also need a properly placed grenade.

2 How can I take bean-shaped warriors seriously? Buddies are incredibly vicious. The developers have equipped them with "Artificial Incompetence," so they make mistakes but are very competitive and rude. You better recognize!
3 How many of my real-life buddies can play? Up to four players compete in colorful split-screen multi-player modes ranging from Death Match to a truly bizarre "Capture the Pig."

INSIGHT

Q. How many hidden characters are in the game?

A. As you beat computer opponents in Vs. mode, you earn the rights to play as them. So far, there are 10 of these golfers.

Q. What are some of the taunts like?

A. Sometimes the opposing caddy will say, "I have to go to the bathroom!" right as you stroke the deciding putt. Other noises include crowd cheers and assorted screams.

Q. Is it better than *Cyber Tiger*?

A. It's not finished yet, but if this is any indication, we'd rather buy one copy of the unfinished *Hot Shots Golf 2* than receive 20 free copies of EA's copy cat.

The original *Hot Shots Golf* made fairways safe for the average fan again by speeding up the pace of the otherwise slow sport and going the goofy route when it came to character designs and animations. Will the sequel continue *Hot Shot's* dominance, or is this the year Tiger takes over?

Stroke play. Shafts. Putting from the rough. No, this isn't a new game based on the movie *Boogie Nights*, it's the sequel to one of the most entertaining golf games ever created. *Hot Shots Golf 2* takes all the zany gameplay of the original title and adds even more features and crazy characters to the mix. The game sports six game modes, including Tournament, Stroke, Match, Vs., Training, and a new Nine Hole contest. *Hot Shots* also features six golf courses and a whole new cast of free swingers, including a fat man with bigger ears than Spock and a variety of hidden characters instantly recognizable from past PlayStation titles.

What makes *Hot Shots Golf 2* special, though, is also what made the first *Hot Shots* so great to pick up, and that's ease and speed of gameplay. There's no waiting around in *Hot Shots*: you hit the ball, see where it lands, and instantly you're picking out clubs and setting up your next stroke. Also,

SWEET STROKE Cedric blasts his ball up the fairway to set up an eagle.

there are no confusing meters that need to be mastered like other golf games, just a simple power and accuracy bar that are easy to view at the bottom of the screen.

Also adding to the game's competitiveness is the new smack talk feature (why is this in golf and not a basketball game?). During multi-player matches, opponents can press the buttons on their controller to yell different phrases and attempt to distract golfers from concentrating on their swings. Some of the phrases get annoying, but then again, that's the point of talking trash.

Fun features like this help the *Hot Shots* series appeal to more than just the average golf fan. The original game was so good that it has already spawned rip-off titles like *Cyber Tiger*. But by improving the gameplay and adding new features, *Hot Shots Golf 2* should swing ahead of its competition the moment it steps onto the gaming green this March.

Q. Tony who?

A. Champion skateboarder Tony Hawk is practically a living legend, and the only boarder to successfully pull a 900 in competition.

Q. Do I have to play as him?

A. Well, considering how clumsy you are, you wouldn't want to play as yourself. But there are nine other recognized pros in the game with signature styles and tricks.

Q. And once I master the way of the board?

A. Yeah, right. Try checking out the two-player split-screen trick attack mode if getting your butt kicked by the computer gets to be too much for you.

Mere mortals rejoice! There is a (relatively) pain free alternative to attempting to bust a 900, and spending months in the hospital receiving skin grafts.

Ouch, my thumb hurts. Although I can hear the derisive laughter of bruised and battered skateboarders everywhere, injuries like this don't happen everyday to a game editor. A preview version of a game doesn't usually consume your soul and force you to play over and over again until a callus develops on your thumb. Rest assured I will fill out a worker's comp claim just as soon as I finish one more run.

Fans of the PlayStation version of *Tony Hawk's Pro Skater* know all about the addictive qualities of this skateboarding title, of course. It's rare that a game successfully melds the fun and fantasy of a video game with the intrinsic realistic elements of a sport. *Pro Skater* managed this to perfection and makes a compelling argument for it to be named the best PlayStation game of the year.

Luckily, for Nintendo 64 owners, there's no need to be envious of their PlayStation owning rivals, as *Tony Hawk's Pro Skater* is coming for the N64. An early look at the N64 game reveals that all the qualities that made the PlayStation version a hit should survive the console transition unscathed. The

HAWK'S EYE VIEW The huge environments is the canvas, and you are the board artist.

N64 has no problem recreating the fast, smooth, attractive graphics that so successfully conveyed the speed and thrills of skateboarding on the PlayStation.

You'll still find 10 huge levels ranging from skate parks to street courses to even a shopping mall. Varied multiple objectives on each course keep the gameplay from getting stagnant, as one run you'll race against the clock to find items, while another you'll focus on stunts in order to rack up the most points.

But the key to *Pro Skater* is the sophisticated trick/combo system that is both intuitive and challenging at the same time. The balanced learning curve somehow manages to make the game compelling even if you're trying to master a novice-level trick or attempting to defy the impossible on some insane expert-level combination.

It's good to see that the N64 is finally getting a quality third party title to supplement Nintendo's own quality line-up. Now, if I could just get a Cortisone injection for my thumb...

INSIGHT

Q. So what's the story here?

A. Framed for a crime he didn't commit, Gabe is in a race to prove his innocence and stop the Syphon Filter virus from being sold to terrorists.

Q. Who would want to buy a deadly virus?

A. Russians. They're using Yeltsin's vodka fund to try and buy their way to global supremacy.

Q. By making everyone sick?

A. By treating them like rock stars. If released, the virus makes people violently ill and drowns in their own vomit, just like Led Zeppelin's John Bonham.

***Syphon Filter* snuck onto the charts in early 1999 and stayed there, held in place by its stylish gameplay and strong word of mouth. A year later *Syphon Filter 2* looks poised to make history repeat itself with lots more of what made the original so much fun to play; sneaking around as a bad-ass covert operative, the unstoppable Gabe Logan.**

S*yphon Filter* was a thinking man's shooter where silence and stealth were the two main weapons. A fully automatic machine gun always helped in a tight bind, of course, but a head shot from a silenced 9mm was the true way to go. Missions were based around taking everyone out without being seen or setting off an alarm, so the true soldier mastered being quiet.

Syphon Filter 2 is keeping the heart of the game intact and packing on plenty more features to keep fans of the series happy. The way to please your bloodthirsty devotees is to provide them with plenty more weapons, and they're in here. 25 weapons will be available, including an automatic shotgun, a flame thrower, and a sharp combat knife for hand-to-hand combat.

With so many new toys to play with, there better be some funky new playgrounds, and they're here too, with more than 20 levels to be

included. To make it all the more interesting, Gabe Logan's counterpart, Lian Xing, is now a playable character and has eight levels all her own. So if you thought this game was too testosterone drenched, a woman has now stepped up to show her worth.

One true test of a soldier is one-on-one fighting, and a two-player deathmatch option has been added to see who's really the best in the field. Game characters can be used as well as some random ragamuffins like lepers and bag ladies. All this infighting will happen across 20 different levels, giving players plenty of options for where they want the bloodshed to happen.

Head shots will be fired, grenades will be flying, and friendships will be tested. Pretty soon, the spy action genre will be expanded that much more by *Syphon Filter 2*'s presence. It's a future packed full of espionage gaming action, and it's definitely worth looking forward to.

Guns without the gore

For those who want to get their shooting kicks but don't want to support gun runners, child-killers, or any other assorted NRA folk, there are plenty of paint alternatives. We found two stores that specialize in various kinds of paintball guns:

Action Sports Paintball and **Advanced Tactical Systems** (ASP makes goofy looking guns that get the job done, while ATS's guns drain through 720 rounds a minute while still looking like the real thing.

Spyder Compact 2000 (ASP) - \$99.95

One of the cheapest guns you could possibly buy, this is definitely for beginners. You'll be cocking the gun between each and every shot. Unless you have incredible aim or a good fast hand for cocking the gun, so to speak, the best use for this is shooting cans on your front porch.

AT10 (ATS) - \$519

Here's a solid handgun that'll get you out of most scrapes. Based on the MAC-10, this puppy has a 25 round clip and can fire on either semi or fully automatic modes.

Shocker:4x4 (ASP) - \$634.95

It may look like an alien probe, but the Shocker packs some serious heat. A handy regulator shows you how much pressure you have. This way, you won't try to ambush someone and have your paint balls dribble out the barrel of your gun.

AT16 (ATS) - \$1089

Weekend warriors, your gun is here. The historic M-16 was the inspiration behind this beast, and you better show some respect. For all those with Rambo fantasies, a 200-round clip can be strapped to this baby for a solid 17 seconds of fully automatic paint inflection.

■ SYSTEM Dreamcast ■ PUBLISHER Sega ■ DEVELOPER Atlus ■ THEME First-person shooter, involving strange demonic possession and fascist overtones ■ PLAYERS 1 ■ AVAILABLE N/A

INSIGHT

Q. So it's kind of like a *Quake* rip-off?

A. Not really. Same first-person point of view, but *Maken X* is more about hand-to-hand combat than guns and rocket launchers.

Q. Who's the main character?

A. You start the game as a young gal named Kei, but you'll possess other bodies as the game progresses...in a way, the Maken sword is really the main character. Trust us on that. Haven't you always wanted to be a sword anyway?

Q. What else has Atlus done?

A. You may remember them from such games as *Bomberman World*, *Ogre Battle: Limited Edition*, and the *Snowboard Kids* series.

OK, let's see what we've got here. Japanese scientists have figured out a way to link the spirit world with the material world. Meanwhile, a guy named Giant Sleeping Dragon, apparently the ruler of China, has launched an all-out attack on the US and is planning to take over the real world. You play the part of a young girl who is possessed by a demon sword called the Maken. Wait – let's start over.

There are weird games, like *Q-Bert*, and then there are really weird games, like *Chu Chu Rocket*. *Maken X* is a really weird one.

It's a first-person shooter (FPS) with a twist. Make that a few twists. Instead of running around picking up new weapons, you pick up new bodies. And you fight some of the strangest creatures ever to make it into a video game, including a crew of heavily armed enemies with swastikas instead of faces.

Developed by Atlus, *Maken X* has been out in Japan for months now, but Atlus had some trouble finding an American publisher. Luckily, Sega stepped up and agreed to handle the title, although there was no firm release date at press time. With all the voice acting and text to translate, it could be a while. Sega told us a name change

QUESTIONABLE FASHION SENSE This season, waist-mounted Gatling guns are in again. Nazi imagery, however, is definitely out. Don't expect it to make the cut in the US game.

may be in the works, and we wouldn't be surprised if the Nazi imagery disappears, either.

Assuming everything else stays as is, though, we're in for something special. Many console FPS games have some control problems, but *Maken X*'s target-lock system (think *Syphon Filter* or *Zelda*) makes combat both fast and fluid. Once you've locked on to an enemy, you'll track it automatically and can even jump over it to deliver a critical hit from behind. Not that the target-lock takes all the skill out of a battle – if you're fighting multiple attackers, locking on to one can leave you

open to the others.

The story, as previously noted, is a pretty complicated affair, which we will fully explain to you just as soon as we learn Japanese. From what we can gather, you play the part of Kei Sagami, daughter of a scientist who awakens the Maken (Demon Sword, roughly translated). Various strange things happen, which you probably wouldn't believe if we told you, and the sword takes control of Kei.

Instead of picking up new weapons as the game progresses, though, the Maken will let you assume control of other bodies, each

FREAK OF THE WEEK The guy we're controlling may have six arms, but he's not nearly as freaky looking as this monstrosity.

with its own unique abilities. The Maken will then change to a new weapon specific to that character, with different strengths and types of attacks.

Choosing to possess a new body will often cause levels to open up at different times too. But you can also go back and, via the "brain-jack" option, resume control of an old character in order to find alternate exits from certain stages.

Most levels are relatively short, and gameplay emphasizes combat over puzzle solving, although there are a few switches to be switched and the odd bit of crate jumping.

Aside from a good control system, distinctive character design and the whole possession thing, *Maken X*'s other great strength is its graphics. The Atlus team obviously knows its way around the Dreamcast, and *Maken X* is by far the nicest FPS we've ever seen on a console, with no noticeable slow-down problems regardless of the pyrotechnics happening on screen. A bunch of real-time cut-scenes help advance the story, and the background techno/ambient soundtrack fits in perfectly with the ominous atmosphere.

We can't wait for *Maken X* to hit US Dreamcasts so we can get down to some serious bodysnatching.

CHEEKY CHAPPIES Apparently the London subway is a haven for butterfly-men.

Dancing with the Devil

All this talk of possession has got us all stirred up. If some wacky demon sword can do it, why not cut out the middleman and go straight to Beelzebub himself?

When you sit down for a spirited game of *Maken X*, you'll find it involves more than a little demonic possession, but if the Devil comes to dinner and decides to stay, it's no laughing matter. Or so we've heard.

From 1688 to 1690, Englishman Richard Dugdale, also known as the "Surey Demoniac," was possessed by the Devil, according to county records. Reportedly, he'd been on a three-day mead binge when he was approached by an agent of the Devil, who offered Richard greatly improved dancing skills in exchange for his soul. Richard, never one to pass up a deal, signed on the dot-

ted line and was a demon on the dance floor from that day forward. However, like a town in the wild west, Richard's body wasn't big enough for the both of them and things soon soured. Unforeseen side effects plagued our demonic twinkle toes - levitation, strange voices, a predilection for shouting profanities, that sort of thing - and Richard was confined to his bedroom until the Devil decided to move on to greener pastures in 1690.

This cautionary tale set us thinking - has anyone we know, or know of, made a pact with Satan recently? Hmm...could be.

Brian Boitano

Brian skated into America's heart and onto the cover of *Sports Illustrated* with his stirring, masterful performance at the '88 Olympics. Clearly, dark forces were at work - even the Russian judge was misty-eyed. What would Brian Boitano do? We'd rather not know.

Sir Andrew Lloyd Webber

Not much of a dancer himself, but he is responsible for *Starlight Express* - a musical involving thespians dressed in spandex and glitter, on rollerskates, pretending to be trains - along with a number of other theatrical atrocities. We're keeping a close eye on him.

Michael Flatley

Lord of the Dance or Lord of the Flies? The man behind *Riverdance* must be possessed by the Devil, and may very well be The Dark One himself. Plus he wears leather pants, and always finds an excuse to remove his shirt. Is there an exorcist in the house?

Patrick Swayze

The star of *Dirty Dancing*, the movie that taught a nation to love, laugh, and dance again, Swayze is still - still - making movies, even if they are ones you've never heard of. Not even *Road House* could totally derail his career. What more evidence do you need?

Q. So I can go with phasers or photon torpedoes?

A. There are 32 different weapons. If some seem a bit familiar, we'll just chalk it up to coincidence.

Q. Will it be one colossal battle after another?

A. The space battles are epic, but with 50 multiple-objective missions, it'll take more than an itchy trigger finger to win.

You have fought a war of rebellion, you have tasted a war of sweet vengeance, but now, you face a war without allegiance.

Anyone who's ever watched *Star Wars*, *Battlestar Galactica*, or *Babylon 5*, can't help imagining what it must be like to be embroiled in a dogfight to the death among the stars. But unless you manage to hitch a ride with E.T., the only chance you'll get to test your mettle in a blazing inferno of lasers is to strap into *Colony Wars: Red Sun*.

Red Sun is the third installment in the vaunted *Colony Wars* series, which has set the standard when it comes to epic space shooter action. Featuring enhanced graphics, the thrill of watching your missiles decimate a gargantuan cruiser just became even more enthralling.

If *Colony Wars* was merely an endless series of laser battles, the game would probably seem stale in short order, but the series has always been known for its compelling storylines that bring this unique universe alive. Over the course of 28 movie sequences, you will be introduced to a mercenary named Valdemar and a majestic starship called the Red Sun. A mysterious stranger has asked you to embark on a quest that will culminate in victory or annihilation. But the question is, whose victory or anni-

hilation, and why?

A revised mission structure allows you considerable freedom in determining exactly how you will proceed. Will you accept profit-oriented mercenary missions in order to procure more powerful ships? Or will you modify your vessel so that you can unravel the mystery without too much affiliation to the League or the Navy? The choice is up to you.

HOTH-STYLE PLANET Lumbering armored transports from a galaxy, far, far, away?

Phasers on Kill

Valdemar is a lone mercenary in *Colony Wars: Red Sun*. Good move, because annoying sci-fi sidekicks suck. *incite* aims to eradicate the scourge.

Jar Jar Binks - *Star Wars*

Traits: Jive talking, butt kissing, and general ineptness.

Crime: Darth Maul dies and Jar Jar lives? Final, definitive proof that George Lucas has succumbed to the Dark Side.

Punishment: The slow, agonizing death of a Sarlacc pit is too good for Jar Jar. We propose a light saber enema - use the Force to turn it on.

Blor - *Lost in Space*

Traits: A hyperactive, cowardly, and clingy space monkey. Anyone for creating another endangered species?

Crime: Danger, Will Robinson! The most forgettable character of an utterly forgettable movie. I want a refund!

Punishment: Let the spiders have another shot. Minced monkey pie for the arachnids means more bananas for us.

Twiki - *Buck Rogers*

Traits: Obsequious Buck brown noser.

Crime: Twiki's only purpose was to spout decidedly unfunny one-liners and try to pick up any of Buck's sloppy seconds.

Punishment: You might say Buck Rogers was punishment enough, but a run as Tattoo in *Fantasy Island* in the 25th Century seems more fitting. "Biddi biddi biddi... Da plane, boss! Da plane!"

Muffit - *Battlestar Galactica*

Traits: Unconditional stupidity.

Crime: We've met rocks smarter than this pseudo-dog. You'd think that running away from Cylons would be the first pet trick programmed in.

Punishment: Muffit's owner, Boxey, was far more annoying. A little Cylon torture session with a "retrained" doggit would be heartwarming.

Q. What's *Armored Core* number three packing?

A. Well, if you look in the jewel case for the game, you'll notice it's packing two CDs worth of robot stomping, mech blasting action.

Q. And what's on those two CDs?

A. How about 19 new missions, over 150 arena competitors in 11 different classes, and 170 weapons and parts - 27 of which are all new.

Q. But what's the one thing I need to get the most out of the game?

A. A friend. The mission-based single player mode is challenging, but the two-player head-to-head action is what will distinguish the game.

As you strap yourself in your towering armored robot, you can't help but recall the armor suited knights of history.

If you managed to catch *The Iron Giant* in theaters last year, you were treated to a heartwarming tale of a mammoth robot that was misunderstood and unfairly persecuted. Now, this gentle giant approach may work with the kiddies, but frankly, for the more mature, malevolent members of our species (read: gamers), it bordered on nauseatingly smarmy.

For our money, *Armored Core: Master of Arena* takes a far more realistic view of what it's like to be a 50-foot tall automaton. An armored leviathan armed to the gills with the latest in high-tech weaponry isn't going to be your little after-school buddy. That's right, mess with the big iron guy and you're going to get an armor piercing rocket up your rear exhaust pipe.

Master of Arena is actually the third installment in the *Armored Core* series, which has garnered high marks for its robot against robot combat action. As the mercenary pilot of an AC unit, you'll infiltrate bases, rescue hostages, and destroy a scrap yard's worth of hostile enemies. In Arena mode, you'll be able to square off against the

computer or another human opponent in one-on-one deathmatches.

Practically every mechanical part on these battle bots can be upgraded or replaced by purchasing new weapons and parts. A nice touch is that players are able to import saved AC's from the previous *Armored Core* games, and use them in *Master of Arena*.

The multiplayer aspect of *Armored Core: Master of Arena* is especially notable, as there are 12 stages for CPU battles, 10 for split-screen action, and 20 stages available for link play. The link capability support is, sadly, a rarity among PlayStation games, but if you can manage to set up two TVs and two PlayStations connected with a link cable, you are in for the best multiplayer action this side of a PC.

With its vast array of game modes, customization features, and hidden bonuses, *Master of Arena* should be junkyard heaven for mech heads. Now, if only you could pop the Iron Giant in this game....

You Talkin' to Me?

Fare trade – we try to smash the cabbie stereotype.

Meet Yuri Smilovitsky, a Russian taxi driver working in San Francisco, who's here to quash the taxi driver myth. Let's see how he "fares" after five crazy questions about his job.

1. CRAZIEST PASSENGER?

This happened, like, last week. This guy gets in and at first, he looked fairly normal – like a 40 year-old Italian guy. As soon as he gets in the back, he starts telling me about this fight he was just in, and after that, he starts telling me about how his brother, Alfredo, got shot. And he's telling me all these stories, and I'm tripping out 'cause he's got this real hardcore Italian accent, and then I realize – he's quoting *The f—ing Godfather*. So I say, "Hey this never happened to you!" I wished I was driving on the outside of the car, I didn't want that guy coming anywhere near me.

2. CRAZIEST OBJECT?

Nothing crazy, but I've found a lot of lap-tops. I've returned them all, of course. But you'd be amazed, you can really score in a cab. In my house, we have, I would say, 10 cameras, you know, Canons with the nice straps. People just forget them. We have about a million umbrellas, too, because as soon as it stops raining, everyone forgets ownership of umbrellas.

3. CRAZIEST JOURNEY?

I picked up this merchant marine at about six in the morning, and he's drinking a fifth [of a gallon] of gin, and he wanted to go to the bus station. I asked him, "Where ya going, man?" and he said "I'm going to Tahoe," so in the course of talking to him, I talked him into paying me \$500 to drive him to Tahoe. I got there in about three hours – I was hauling ass – and he was drinking the whole way up, and I swear from the time I met him, he didn't act any differently, but he killed three fifths of gin. He was like a real merchant marine – a big old man, about 50 years old. He was telling me all these stories about all these mail order brides that had f—ed him over.

4. CRAZIEST UNKNOWN PERK?

A lot of oral pleasure. For some reason, some cab drivers get more oral pleasure on a regular basis. Hookers always want to go to Oakland, and they always want to pay via oral pleasure.

5. CRAZIEST STEREOTYPE?

We're not all psychos [laughs psychotically]. There are a lot of psychos, but not all of us are psychos. That's about the only stereotype that doesn't hold up. I'm very cordial with everybody – if you're cool with me, I'm cool with you.

Q. So is this some serious sci-fi game?

A. This game has flatulent E.T.s, a smooth-talking alien leader, and a six-legged dog that smokes stogies. It's more along the lines of *Buckaroo Banzai* than *Blade Runner*.

Q. A six-legged dog, huh? What's the use of that?

A. Man's best friend just got a whole lot better. After all, you know what they say about six-legged dogs, don't you?

Q. Er, no. What?

A. They can shoot loads of weapons at once and give great backrubs.

The Dreamcast arrived with loads of sports titles and arcade ports, but where are the games that really make you think? For all the gamers out there with attention spans longer than a Michelob ad, your day is almost here. Bioware is working on *MDK2*, and it's looking to be the first great adventure game for the Dreamcast.

Picking up right where the original PlayStation game left off, aliens have returned to Earth and they're not happy. Reluctantly, the cybersuited Kurt gets ready to reenter the fray along with his two friends, Dr. Fluke and Max, a six-legged dog. Instead of a solo effort, everyone here gets a chance to sock it to the aliens, each in his own unique way.

Kurt hasn't changed much from his last outing. He still wears his Giger-esque bodysuit, pockets crammed full of weapons and ammo. He can run around and blast away with his chaingun, crank his sniper scope to a 100x zoom and take someone out from across a field, or lob a grenade behind someone and wax the floor with their green blood. In other words, he's a pretty versatile character.

The other characters are two extremes of Kurt's personality. Max is a kick-ass shooting-frenzy kinda

WARM WELCOME Aliens make sure your parachute landing is nice and toasty.

dog who's been watching way too many John Woo movies. Standing on his hind legs, Max can hold, and fire, up to four weapons at once. Get four Gatling guns in his paws and aliens melt like buttah.

Dr. Fluke is the McGyver of the bunch. He picks up items from all over and uses them together to solve problems and create new weapons. Instead of just making toast he can cram some plutonium into a toaster and then pop some bread in for an atomic weapon that has one hell of a kick. Other problems that Dr. Fluke solves are a bit more difficult, but Bioware assures us they're just as goofy.

With three different elements of adventure gaming coming together, *MDK2* is an ambitious project. From what we've seen so far, it's all been handled with a deft touch and an odd sense of humor. If everything continues to go this well, we'll have 10 levels of alien-battling action to warm up our Dreamcasts in the spring.

Q. How about a little net-play?

A. We can dream. You can save your favorite goals to your VMU and then replay them at a friend's house, though...as long as you don't mind losing friends.

One of Japan's hottest arcade games, *Virtua Striker 2*, another hit from Sega's crack AM2 development team, is getting the port treatment. But can the Dreamcast do for the soccer game what it did for football and basketball?

Not likely, but we can hope. Chastain and Hamm-related obsessions aside, America just doesn't share the rest of the world's rabid passion for *The Beautiful Game*. A few people out there understand the power of a good soccer title, though; you know who you are.

Based on the 2000 version of the arcade series, *Virtua Striker 2* features 32 national teams with rosters and formations from last year's international matches. But without a FIFA license, or any license for that matter, *Virtua Striker 2* doesn't include any player names. So while that bald guy on the Brazilian squad might look like Ronaldo, play like Ronaldo, and be a hit with the ladies after hours like Ronaldo, the back of his shirt says Brazil.

Welcome back to Sony's nightmare. The Tim Burton-esque MediEvil returns, and its brave-hearted skeletal hero enters a new millennium, in more ways than one, with more visual polish.

When you're Sir Dan Fortesque, it's tough to get a good eternity's sleep. Five hundred years after *MediEvil*, new villain Lord Palethorn has found magician Zarok's spell book from the first game. Our favorite boneheaded knight is revived

once again when Palethorn casts a spell to raise an army of the undead. It's up to you playing as Sir Dan to recover the last pages of Zarok's book before Palethorn can complete his dastardly plot to take over the world.

Instead of a dingy Dark Ages backdrop, Dan navigates 17 free-roaming 3D levels set in a geographically accurate, albeit slightly twisted, version of Victorian London, facing off against a whole new era of monsters like factory-worker zombies, giant skeletal dinosaurs, and bizarre bearded ladies. To defeat these historic baddies, Dan will be armed with the broadswords, axes, and crossbows from the first game as well as an industrial-age Gatling gun. Plus, the bony warrior will be able to change into different forms like Dan Hand, Headless Dan and Dan-kenstein.

For now, *MediEvil II* has only been announced as a European release, but it should hit American soil soon, especially since the previous game was such a hot seller. Until new details are available, Sir Dan fans should bone up on their sword-fighting skills playing the original.

The board features familiar traps, treasures, and tricksters. You may recognize Bowser's squares, where the angry lizard collects coins from you as a toll, or the ghostly Boo, who steals stars and coins from opponents on your behalf. The most noticeable change is the size of this new *Party*. On top of enormous, themed playing boards like Western Land, Pirate Land, and Space Land, *MP 2* also jacks up the number of mini-games, improving on the 20 existing games and adding 44 new ones. You'll get to go head-to-head in split-screen tank battle madness, grab up mushrooms in a Hungry Hungry Hippos-style frenzy, or drive spike-laden bumper cars around an arena trying to pop balloons attached to your foes' back bumpers.

To make things more interesting, players that end up on the same square toward the end of a round will face off in a duel. The challenging duelist bets a certain number of coins, and whoever

As was the case with the first installment, *Mario Party 2* does feature a single-player option that pits you against up to three other computer-controlled characters, but – as is the case with most party games – it's not very much fun without other real players.

So, bake up some pigs-in-a-blanket, prepare some refreshing beverages, and dial up your buddies. Then, pop in *Mario Party 2*, and have a blast.

MERRILY WE ROLL ALONG In this mini-game, Wario controls the rolling direction of the barrel, while the others just try to stay on.

The Verdict

HOW THEY COMPARE

■ MARIO PARTY 2

More mini-games and more playing boards means more options and fun than the original.

■ MARIO KART

Zany kart racing with the same Nintendo cast of characters is more party fodder.

■ MARIO PARTY

This first party rocked the house, but its follow-up steps things up a few notches.

■ CHEF'S LUV SHACK

This ribald *South Park* trivia challenge just doesn't measure up to its rivals.

■ MONOPOLY

This classic board game is just as time consuming in video game form.

GRAPHICS

■ Cheery and colorful 3D graphics are Nintendo's trademark, especially with anything Mario.

SOUND

■ Standard happy-go-lucky Mario soundtrack and chirpy voices are fitting for this party game.

CONTROL

■ Even though they're noticeable only during the mini-games, the controls are more than adequate.

Mario Party 2

PROS: Large, colorful themed boards filled with off-the-wall, challenging mini-games.

CONS: Old-fashioned turn-based board game waiting time, and not very much fun when playing alone.

OVERALL

Mario Party 2 gives gamers a bigger, better revision of the entertaining Nintendo party game original.

Jackie Chan is known for fast, furious martial arts and creative use of the objects around him. In a perfect world, this frenzy would be all over the place in *Jackie Chan's Stunt Master*. Too bad this world is far from perfect.

There is some essence of a fighting game here, but it's easily lost in the clutter. Problems such as the constant slowdown of the kung fu action thanks to a sluglike loading screen. Twenty-second lulls between lives are frighteningly common, and only the patience of a true Shaolin master will get you through them. The rest of the game doesn't get much better, with cookie-cutter enemies to punch, punch, kick, and levels to climb and fall off.

Opponents are identical except for their appearance and accent. Five phrases get repeated in a

variety of flavors: Chinese, Indian, "old man," and more. Our personal favorite is the French version of "Oh, the humani-tee." You can even repeat the exact same tactics to kill the bad guys every time. Repeatedly performing a roll into a roundhouse kick and finishing with a flurry of punches delivers a world of pain to anyone you run into again and again...and again.

The levels themselves are platform-jumping, conveyor belt-riding, pole-swinging affairs that fill your speech with beautiful, flowing profanity. Let forth a guttural groan as Jackie falls yet again off of a train into oblivion, for example. It all adds up to a damn shame of a lost opportunity. Fighting as the great Jackie Chan should be fast, fluid and funny, not the clunky garbage that *JCSM* ultimately is.

The quintessential Jackie Chan experience can only be had on film. Check out this list of "must see" movies, even if you can't find the english versions. Jackie speaks the international language of Kung Fu, anyway.

DRUNKEN MASTER II

A classic where Jackie defends his town from evil mining interests. Jackie's abuse of alcohol and drunken master moves makes this kung fu bliss. The moral of the story? The more you drink, the better you fight.

RUMBLE IN THE BRONX

Jackie takes on gangs and organized crime in New York. Not the real New York, but what Hong Kong thinks New York is like - with "colorful gangsters." Brilliant fighting and hilarious dialogue abound.

Jackie loses his memory as a covert operative. Lost in Africa, he slowly regains his past and seeks revenge on nasty government types. An insane rooftop fight scene is a classic celluloid sequence.

South Park Rally

The *South Park* gang return in yet another underachieving gaming venture.

GAME GLANCE

- 4 Checkpoints per race
- 5 Types of power-ups and weapons
- 7 South Park locations
- 14 Race varieties
- 30 Characters with 8 to start

Melodious farts, profane one-liners and comical weapons abound in the new *South Park Rally*, but after playing this half-baked cart racing title, you'll likely be quoting Cartman, declaring, "Screw you guys. I'm going home."

The makers of *SPR* apparently went to great lengths to include lots of juvenile gags and even had the benefit of having Trey Parker and Matt Stone at their disposal to add their voice talent. Too bad they spent so much time on the jokey, gimmicky elements and failed to notice that the racing game itself looks and plays so poorly.

There's something terribly wrong with a racing game that

makes it a challenge to figure out what or where the track is. You shouldn't have to spend so much time meandering these poorly drawn courses hoping to catch a glimpse of an occasional arrow that only serves to tell you that you've gone the wrong way. All this confusion is bad enough in a straight-on rally, but most of *SPR*'s races are mission-oriented. So, in single-player, it's nearly impossible to win.

If you should happen to win a race or two, saving your game to a memory card won't record your progress, only characters, areas, or race tracks you've unlocked. So if you leave championship mode at any time, you'll have to start over from the first race and re-win those old races you completed earlier.

Fans have the most to look forward to in the way of creatively conceived weapons, since you'll need to be a fan to understand why they're funny. *SP* aficionados will love the gay dog weapon that attacks opponents by humping their car or the alien probe ray that zaps racers into a Shirley Temple-singing trance. However, don't be surprised if some of the weapons work completely against you, or don't really appear to do anything at all.

Most gamers are probably thinking *SPR* is a *Mario Kart* with all the humor of the clever cable show. It's too bad this game doesn't live up to its potential.

As someone who owns a black Ferrari, you'd expect Tommy Lee to know how to drive. Or at the very least not to weave and waffle like his car has a broken axle, a flat tire, and a driver who's getting tickled. But as he explains, pointing towards the TV where his hovering space cruiser seems to have a mind of it's own, it ain't his fault. "This s— drives wack," he says, pushing the Dreamcast's joystick upwards, "look, I want to go straight, and this isn't even going straight."

That Tommy Lee has trouble going straight might not surprise those who

only know him for his rap sheet and home movies. But after what can only be called a tumultuous period in an already tumultuous life, Tommy has managed to sort everything out. And now, with both his personal problems and his former band, Mötley Crüe, behind him, Tommy has a better sense of where he wants to go than he ever has before, even if he can't get his hovering space cruiser to go straight. Along with TiLo, a rapper who comes from

both Ohio and the group Hed P.E., Tommy's formed a new band, Methods Of Mayhem, whose excellent, eponymous debut is a strong mix of hard rock, industrial, hip-hop, and electronica.

Right now, though, Tommy's playing with a strong mix of guided missiles and machine gun bullets in a game of *Vigilante 8: Second Offense*. "C'mon, you f—er," he grins, shooting at a dump truck while TiLo tries to blast the shark that swims along the beach. "Can you kill the

"We used to sit around and just f—in' play *Galaga*, *Defender*, and *Missile Command*," he says of his Crüe days. "We had an Atari in the back of the bus, and then backstage we always requested a pinball machine, a driving game, and others.

"But ya know what game we used to play all the time?" he continues. "Golf. Like the pro s—. That game, dude, we played in the back of the bus for hours, a brutal amount of hours."

It's doubtful that Tommy will be playing games with his Crüe cronies anytime soon, though. "I haven't seen those guys since I left," Tommy sighs with a sadness in his voice. "It ended on a really sour note. Vince [Neil] and I got in a fistfight, and it was just a s—ty, s—ty ending. It wasn't the way I wanted it to end. It was a bad, dysfunctional, drunken scene."

Back in the game, the guys have decided to switch to the Verses Mode, with TiLo good-naturedly promising his friend, "I'll kick your ass." While driving around the Arizona level, the rapper goes on to explain that, like all good people, video games have sometimes distracted him from doing his work. "Tommy's got this 100-inch screen and this crazy JBL surround system," he explains, "so I'd be playing games on it when we were supposed to be recording."

That problem was resolved, Tommy notes, when the two moved from the Chop Shop, the studio owned by the album's co-producer, Scott Humphrey. "We didn't have video games set up at the second studio," Tommy explains, "there were no games there." But while that did help Tommy and TiLo get more done, it also meant that they didn't get to play games

Despite all the guests (the album also features the talents of Lil' Kim and The Beastie Boys' DJ, Mix Master Mike) the core of M.O.M. is Tommy and TiLo, who get along a lot better than their death match would have you believe. "Oh, f—in' long distance hit!" Tommy yells, nailing TiLo from 40 yards out, while his pal can't do much but watch as his vehicle flips repeatedly. "Y'know what sucks?" the dreadlocked rapper declares, unable to get his bike away from Tommy's gun, "this stupid-ass motorcycle."

With his beating still fresh, TiLo suggests they play the Utah level. This, however, doesn't sit well with Tommy, who groans, "Aw man, it's gonna be all cold and s—." But while everyone in the room assumes Tommy's just kidding, this seasoned gamer is actually being quite serious. "The snow course is always wack," he notes, "Why does every game have a snow course? It's always a bunch of nonsense, you can't ever do anything."

Sure enough, Tommy spends his time in Utah, slippin' and a-slidin' while I ask the Method men if they've been approached about having their songs in a video game. "No," TiLo admits, "can we?"

"We want to," Tommy adds, "We have this song called 'Crash' that would be beautiful for a game."

Having spent more of their game sledging than beating the crap out of the other cars, the guys opt for the warmer climate of Louisiana for their final game. While the two drive around, looking for each other in the swamp, I ask TiLo if they're planning to bring a video game rig on the road with them when they tour. "Oh yeah," he says. "We played constantly. Especially when we were on the bus,

driving from town to town. We played *GoldenEye* a lot, we loved that."

Finishing up the game, I pull the guys onto the balcony to gauge their final thoughts, which seem to be almost totally positive, save for the steering. "The game is cool," Tommy says, "the graphics were good, the steering wasn't, but it was a lot of fun." He also cites the auto-targeting cannon, the ski jump in the Utah level, and the mines in the Arizona level. "It was cool how you'd go in the mine and come out somewhere else — that was tight."

As for TiLo, he largely agreed with

Tommy about the graphics, playability, and, steering problems, but didn't share Tommy's enthusiasm for the environments, saying that in that respect, *Twisted Metal 2* is a little better. "I feel like there's a lot of things hindering you from getting your ass kicked," he explains, "like the buildings and swamps and s—. For beginners, this might be discouraging, but it's good if you've beaten *Twisted Metal*."

Still, for Tommy, there was one aspect of this game that was the most fun: "Getting to kill TiLo. Sometimes it's just fun to kill your bro." **E**

Legacy of Kain: Soul Reaver

Pack your crucifix and say your prayers as you enter the twisted, evil world of vampires.

- 5 Bosses
- 3 Weapon power-ups
- 6 Acquired abilities
- 7 Spells
- 14 Levels

In the land of vampires, blood will feed you, souls will sustain you, and revenge will bring you back from the dead.

From the opening moments of its mesmerizing movie intro, *Legacy of Kain: Soul Reaver* draws you into a world where pain, mutilation, and desecration are the norm. A world where vampires feed on the pulsing blood of humans and the damned consume the very souls of their victims. Granted, if the bloodsuckers

wore suits, it would be a world much like our own, but the point is, Kain's world is a dark and unholy place that just begs to be explored.

But before you grab your wooden stakes and garlic cloves to dive into this virtual and otherworldly Transylvania, a little back-story might be in order. The events in *Soul Reaver* occur hundreds of years after the end of the first game in the series, *Legacy of Kain: Blood Omen*. Gamers familiar with *Blood Omen* will recall that the

game had two alternate endings; Kain could choose to remain a vampire and take over Nosgoth, or sacrifice himself so that humanity could survive. Considering the dearth of Mother Theresa-like attributes in the world, *Soul Reaver* just assumes you chose the megalomaniacal ending. For those of you who picked the wussy "save the world" ending – pick up a copy of *Hello Kitty's Cube Frenzy* in lieu of the latest installment of Kain – your world does not exist here.

DEFINING MOMENTS

First Impressions

In the very early moments of *Soul Reaver*, you enter a room inhabited by a grotesque vampiric beast. You try slashing at him with your claws, only to discover that you can merely wound, not kill. Desperately you look about, see a spear on the wall and lunge for it. With weapon in hand, you face your nemesis again. This time, your attacks cut deep, staggering him. With a final thrust you skewer your enemy, and with his blood spurting you lift him impaled on your spear. As his soul departs his physical form, you consume it and add to your strength. A satisfying meal indeed.

Roger Burchill

SWORD PLAY Acquire the Soul Reaver to dispatch enemies with ease.

As the saga continues in *Soul Reaver*, you are now playing the part of Raziel, one of Kain's Lieutenants. Raziel comes from the Tom Cruise school of vampires, sporting a recently sprouted pair of wings that would make Batman pop a chubby. Naturally, it's never a good idea to show up the boss, and Raziel pays the price as Kain mutilates his wings and orders Raziel's brothers to cast the poor guy into Nosgoth's very own Lake of the Dead. The end result is our dapper young Raziel is horribly disfigured as he suffers unyielding torment and eternal damnation.

Of course, as "life without parole" has a distinctly different reality from its implied definition, eternal damnation turns out to be a mere few hundred years for Raziel. He emerges from the abyss with little chance of ever getting a date again and seemingly oblivious that the scarf he's sporting is a serious

fashion faux pas. But as it turns out, the Guardian of the Dead is seriously pissed off with Kain for disrupting the natural balance between the dead and living. Raziel is tasked with opening a major can of whoop ass on Kain, and he's got a serious, soul-sucking need for revenge as motivation.

Unlike the 2D, top/down perspective of *Blood Omen*, *Soul Reaver* is your standard remote camera 3D action/adventure game in the mold of the *Tomb Raider* series. *Soul Reaver* offers plenty of third-person perspective fighting, exploring, and puzzle solving, but there are enough innovative gameplay twists to make for an evolutionary step forward for the genre.

One of the most intriguing features is Raziel's ability to switch from the Material to the Spectral Plane. The Material realm is reminiscent of our real world, where one

But for every plus side, there's a down side, and that's true here. In order for Raziel to exist in the Material world, he must expend energy. Raziel must keep his health bar loaded by devouring the souls of any and all nightmare creatures he comes across. The ultimate prize is Kain's sword, Soul Reaver, which becomes Raziel's primary weapon and is as handy as a Ginsu knife.

comes to cutting, silencing, and dicing. The sword is always available within the Spectral realm, but Raziel must maintain full health in order to wield Soul Reaver in the Material plane. If Raziel takes damage, the blade disappears until the health bar is back to normal. Soul Reaver is acquired relatively early in the game, but its true capabilities won't be realized until it is imbued with various elements like water, fire, and sunlight.

Like most games that employ the use of moving camera angles, there are times in *Soul Reaver* when it is difficult to get the precise gameplay view you want. There is some necessary juggling of attention between the roles of cameraman and game player, but less so than most 3D adventure games

to date. Another annoying element is the number of block puzzles utilized in the game. The seemingly endless series of block manipulation and switch pulling can get rather tedious. To be fair, the puzzles are a bit more elaborate and challenging than those employed in *Tomb Raider* games, but the combination of difficulty and frequency of puzzles still leads to frustration.

Still, the Dreamcast version of *Legacy of Kain: Soul Reaver* is a fine upgrade of the already enjoyable PlayStation game. An improved frame rate and more attractive textures upgrade the graphics and correct the only significant pitfall the PlayStation version had. Beyond the morbid themes and gratuitous violence, *Legacy of Kain* offers a solid story and involving gameplay, and it is the only truly entertaining adventure game available for the Dreamcast.

■ SOUL REAVER

Amazing, innovative, with hours of gameplay, it's soul-sucking, vampire-killing action worthy of a legacy.

■ SOUL REAVER PS

The PlayStation version can't touch the DC visually, but it's the same otherwise.

■ SHADOW MAN

Voodoo and serial killer overtones are creepy, but gameplay is standard fare.

■ BLUE STINGER

Technically flawed and tedious, the sting is in your wallet, if you bought it.

■ SLAVE ZERO

GRAPHICS

■ Sharp resolution and sublime textures shape the world. Raziel's a bit angular, but he has been rotting for centuries.

SOUND

PROS: No-holds-barred blood letting; dark, compelling story line; graphics that do the Dreamcast proud.

CONS: Block puzzles from Hell; bouts of "What the hell do I do next?"; already played the PlayStation version.

Or if you're a rabid Nintendophile, imagine *Cruis'n World* with a set of intelligently designed courses, a complete graphical reconstruction, and all of the original code destroyed and replaced with a physics engine designed by Namco developers and not monkeys.

Of course, this improved conversion leads to one overriding point – the game plays identically to its PlayStation brethren. Pick a car from two major types – chunky rally cars with great cornering or

The courses you'll be ripping around need your respect – they've influenced all the track designs of B-grade Nintendo racers since 1996. Now, Nintendo has scooped together more of everything into a handy cartridge-sized bundle. Like all of *Ridge Racer's* courses. OK, so

that's one track, but there are two different variations. Then there's all the *Ridge Racer Revolution* courses. All right then, *course*. But all three variations are replicated, with fog, no pop-up, and some increased ground details. Then, there's a whole new set of tracks, a challenge mode, superb multi-play, and even a customizable car color, which can be changed to any hue, however unsightly.

Japanese PlayStation fanatics may be only a month away from the new standard in racing games – *Ridge Racer 5* – but Nintendo 64 owners also have a reason to look smug. They've got an old-school amalgamation of all the best bits from the *Ridge Racer* franchise.

In the original PlayStation game *Star Gladiator*, a diabolical terrorist group led by Dr. Bilstein attempted to destroy the Earth with devastating weaponry based on the energy of the mind. At the end of the game, Dr. Bilstein was thought to have been defeated, but now, one year later, his ghost returns to pilfer our planet and wreak havoc on the heroic band of brains that killed his human form.

The game *Plasma Sword* combines the 3D atmosphere and simplistic gameplay of past Capcom beat-'em-ups like *Street Fighter EX* with the weapons-based confronta-

tions and slick presentation of *Soul Calibur* to deliver a ferociously fast, fierce fighter that ranks among the Dreamcast's best. The futuristic combat features 22 combatants, from robots and wizards to aliens and bird men, bashing and smashing each other in one-on-one duels to the death with the fate of the planet swinging in the balance.

The gameplay not only includes the typical Capcom combos, throws, and special attacks, but also features new twists and fighter abilities. Using Plasma powers, you can suck opponents into force fields, use Revenge to counter attacks, and even freeze enemies in their tracks as you pummel them in a scene of flash and fire. Definitely worth checking out, especially if you're a fighting game fan searching for a futuristic fix.

While it may have been cool playing as goody-goody *Mega Man* in last year's *Mega Man Legends*, it's much more fun being b-b-b-bad in this latest installment in the Capcom franchise.

The fans of *Mega Man* won't likely forget the corrupt and thieving Bonne family, namely younger sister Tron and her Legomen-like Servbots. Now, bratty Tron stars in her very own adventure, and that petite banshee-in-training kicks ass in what may be the best game so far in the popular Capcom series.

This newest addition to the enduring *Mega Man* franchise finds the Bonnes pillaging another Island on their waterlogged planet. A loan shark has tracked down Tron's brother, Teasel, and when he can't pay up, he's held until Tron can come up with a way to settle the debt. So, the resourceful Tron kicks into high mission gear, collecting

Fortunately, Tron has all 40 of her Servbots at her disposal. But, Tron has to get them into fighting shape. Put them through their paces in the gym or find objects that inspire them to develop special talents. Then they'll help you build new weapons, or perform better in battle. In the field, you'll command six bots that either fight enemies or gather up treasure.

The controls can be awkward until you've worked with them in a few levels, but fans of *Legends* should have no trouble. *Tron Bonne's* cuteness can be tough to stomach, especially those long cut scenes filled with shrill voice-overs. Luckily, you can speed through them with your triangle button.

- 3 Propulsion mechanisms

Dreamcast road ragers have finally been given license to blow each other up without fear of incarceration. Step up, strap in, and burn 'em, baby, burn 'em!

If plain ol' Sunday drivin' just isn't your bag, you like breathing toxic fumes, or you consider smoldering husks of metal fine art, then you need to turn your gaze toward the slick, destructive power of *Vigilante 8: Second Offense*. If you're confused on the concept, here's a little clue: picture not-so-desolate wastelands loaded with obstacles, weapon power-ups, and other treacherous devices, then drop in some of the meanest hombres from the past and the future driving fully

loaded muscle cars, cycles, and big-ass trucks. Sound warm and cozy? It is – especially when you set your opponent's rig on fire.

While the basic gameplay is the same as its predecessor's, *Second Offense* features a little more depth, such as the ability to upgrade your ride. After destroying an enemy, "salvage point" power-ups appear, which, when enough are collected, can dramatically improve your car's look and performance. There's also a gang of intense multi-player modes, including three two-player and three four-player games. It's good, wholesome fun the entire family will love.

Vigilante 8: Second Offense will make a huge impact, offering the only game of its kind (for the moment) on the Dreamcast. By combining highly combustible gameplay, smooth visuals, and tight controls, it's A-list material.

Racing fans rejoice; all others please leave the room, we could be a while. Before proceeding any further, there's one number you need to acquaint yourself with: 590. Say it a couple times, maybe try an Italian accent. That's how many cars are in *Gran Turismo 2*, the new greatest driving game ever made.

You know those bibs you get at the dentist's office so your drool doesn't get all over your shirt? Might want to invest in one of those right about now. If you like cars, even just a little bit, *Gran Turismo 2*'s opening movie will leave you slack-jawed and temporarily unable to form complete sentences. Get used to it, because you're going to be feeling this way for the next few weeks as you come to grips with this enormous game.

A few more key numbers, the significance of 590 already being established: two disks, 49 tracks, 35 manufacturers, and well over 100 hours of on-the-stick time to win every race. Not including the arcade mode.

"Fine," you may be thinking, "but is *Gran Turismo 2* really better than the original?" Well, we consider *Gran Turismo* to be nearly perfect as far as driving games go. *Gran Turismo 2* is basically the same in terms of handling and

gameplay, but with four times as much stuff. Four times nearly perfect equals better than the original, at least by our reckoning.

According to the game's producer, Kazunori Yamauchi, *Gran Turismo* used 75 percent of the PlayStation's processing power. The sequel uses the full 100 – alas, unlike most pro football players, the PlayStation was unable to give 110 percent.

The single-player *Gran Turismo* mode is where all the magic happens, and that's where you'll find most of the new additions. Despite the changes, though, fans of the first game will have no trouble jumping into the action. Your Home

The manufacturers have been grouped into four separate areas, according to nationality. German and British makes have called an uneasy truce and occupy the North City, Japanese companies in the East, American to the South, and Italian and French in the West City, obviously the rough part of town.

Otherwise, the same buy/race/tweak/repeat dynamic is at work, except on an even grander scale. Developer Polyphony Digital didn't

When the first *Gran Turismo* came out, I realized I could quit my job as a road tester at a car mag and get all my fast car kicks on the PlayStation, without having to think about tedious financing options or lease agreements ever again. Now that *Gran Turismo 2* is here, packed with all the latest cars as well as the best classics, I may have to take a bit of a vacation and get some serious time on the stick. Gran Turismo 2 may have over 500 cars, but there are still a few more we'd like to see when *GT 3* rolls out sometime in 2001.

McLaren F1

The fastest production car in the world is in *Test Drive 6*, but not *GT2*. What the crap? Hey Polyphony, sort it out. We can live without Lamborghini, but not the F1.

Mercedes SLR

The 557hp SLR Coupe and Roadster probably won't be on sale for at least another year, and when it is, we won't be able to afford it. Perfect timing for *GT 3*, though.

BMW Z8

The next Bond car goes on sale this spring, and with a circa-\$100,000 price tag, you won't want to be scraping it against a real guardrail.

Ferrari 360 Modena

One of the greatest driver's cars in history, if the 360 Modena doesn't make it into *GT 3*, we will seriously consider a hunger strike.

Cars we don't want to see in GT 3

Gran Turismo 3 Dis List

Gran Turismo 2 may have over 500 cars, but there are also a few we hope will never see the light of day in any video game.

Cadillac-Northstar LMP

Is it just us or is the concept of Cadillac entering Le Mans kind of silly? Cadillac should have had its mid-life crisis 20 years ago; it's a little late now.

VW Thing

One of the worst cars ever made, the only time you'll see one is when Patty and Selma of *The Simpsons* take theirs for a spin. No letters from the owners club, please.

NEUKOM

Honda's prototype NEUKOM, also called the "Open Communications Capsule," features a driver's seat that swivels to face backwards. That's what we call a bad idea.

DAIHATSU MICROS 31

This little honey may get great gas mileage, but we'd rather not know how the 659cc, 3-cylinder bundle of fury behaves on the racetrack.

aren't for sale – although you can win them down the line in your racing career.

Many car makers in *Gran Turismo 2* also have one or more race series for specific models. Honda, for example, sponsors an NSX Trophy race, two Civic races, two S2000 races, a Type-R Meeting (open to all Civic, Integra, Accord, and NSX Type-R models), and a race just for the Honda Beat, a pint-sized, 656cc red-hot poker of a city car they've got over there. These races don't have any license requirements either, so if you hate the license tests you can still play the game for hours without taking a trip down to the virtual DMV.

Oh yeah, the damn license tests. There are three more! International-B and C licenses and a Super License have been added to the original B, A, and International-A lineup, for 60 license tests in all. There's some good news though: if you can dig up a memory card with your *Gran Turismo* saves on it, you can transfer some of your license qualifications to *GT 2*. You'll still be in for some old-fashioned pain, misery, and joy-pod throwing, but it's definitely worth checking under those couch cushions.

For the video game gimps out there who have a little trouble figuring out what the X button does, Polyphony has got you covered this time around. The correct racing line

is marked in yellow on some sections of the first B and A license tests, which makes learning cornering basics much easier. There's also a demonstration mode now, too, so you can watch a computer-controlled car complete each section with a Gold rating and even see where the best braking and turn-in points are. It helps, but you'll swear the computer cheats. Some new types of tests have also been added, like slalom courses and a skid-pad kind of affair, along with a few dirt track sections. It seems easier to get a Bronze qualification this time, although that could be because we spent a sick and wrong amount of time playing the first game.

Once you're all licensed up, the

serious business of wasting your life in front of the TV begins in earnest. Now's a good time to put the local pizza joint on speed-dial. Aside from the single-model races, there are four main race divisions: Gran Turismo Leagues, Special Events, Rally Events, and Endurance. You'll begin with the Special Events, which include the familiar Sunday and Clubman Cups, a Muscle Car Cup, '80s Sports Car Cup – there's even a hotly contested Station Wagon Cup. There are 22 different race classes in all, each consisting of three to five individual races with separate license

and horsepower requirements and prize money.

The Grand Turismo Leagues are comprised of national and international races, culminating in the World League class, a five-race extravaganza that allows you to finally prove once and for all just which country makes the best cars in the world. So the next time the topic comes up at the bar, you'll be ready.

The Rally Events are the biggest change to the GT formula. There are nine rally tracks, including a section from the Pike's Peak Hill Climb for those real life rally fans. Each race is like a time trial, with three different ghost cars that need beating on every track. You'll have to buy yourself a set of dirt tires before the serious off roadin' can commence, and don't even try taking your fly Jaguar out to the hills; only certain

cars are rally course compatible.

We're happy to report that the rally racing sections are just as fun as the road tracks, and the cars behave totally differently. Expect a lot more tail-out action than in the street races, plus jumps (or "yumps," as they're known in rally-fan lingo. Most hardcore rally fanatics are Scandinavian, you see). Compared to dedicated rally games like *Colin McRae*, *GT 2's* dirt track sections feel almost as well done. Sony tells us the physics have been tweaked for the US version, and cars have much more grip than in the Japanese release. We've got no complaints. It's like getting *Sega Rally 2* in the bargain, sans the painful guitar solos and svelte graphics.

Then there's the Endurance races, all seven of them, for the

HOUR 0 Holy crap it's finally here! The opening movie almost reduces me to tears. Let's watch it again. Wait – this is the arcade disk? Screw that, gimme disk two.

HOUR 3 Whizzed through my B and A license tests, then got overconfident and decided to go for all Golds in B. The last stage almost killed me.

HOUR 9 Right. Back in the thick of it. I've got about 60 grand saved and decide to get a little crazy. I buy a BMW 328ci – she's a real honey. Slap a stage three turbo in there and it's good night, Irene.

HOUR 16 I venture off-road for some rallying. Things are going well until I'm repeatedly beaten down by a freak of nature called the Suzuki Escudo. It's got front and rear wings that would dwarf a formal dining table and hauls serious ass. Must save up and buy one.

HOUR 20 Jumped into my real Miata for a beer run and almost lost the back end around a turn. Luckily my GT training kicked in and I recovered. Note to self: real life is not a game. Must remember that. And steer into the skid.

HOUR 24 I am a very rich man, the sort who might drive a different car every day of the week. My race-prepped TVR Speed 12 tops out at 242mph and devastates the competition, but it's a bit of a handful. Soon, the Escudo will be mine. Right after my eyesight returns.

true masochists out there. A two-hour race around the Rome Circuit, complete with pit-stops? Tell us how you got on.

Bottom line is there's tons of different races, and if you want to win every one of them you'll need to have hundreds of cars in your garage. Of course, anything resembling a social life will just get in your way, so you might want to call your friends now and break things off amicably.

In the original game you could get by with a handful of tricked-out models, but in *GT 2* you're going to have more cars than Jay Leno. Luckily, many of the cars you'll earn for winning a race are very good and can be sold for obscene amounts of cash (a TVR Speed 12 from one of the GT All Stars races will net you a cool 500K), so after a few hours of play your money woes will be long forgotten.

Graphically, *GT 2* is pretty much identical to the original. It looks great for a PlayStation game, but the Dreamcast — and the few glimpses we've had of the PlayStation2 in action — have spoiled us rotten. The blocky textures used in some of the scenery now stick out a

little more than they used to, although you'll only notice this in the replay mode. When you're in the hot seat, you'll be too busy setting up for the next corner to find fault with the scenery. Slowdown is never a problem, even in the two-player mode, although it kicks in now and again in the replays.

The soundtrack (in stores now) is an alternative rock extravaganza featuring Beck, the Cardigans, Filter, Rob Zombie, and a number of others. Unfortunately, the menu screen music still sounds like it was made by a guy and his \$100 Casio keyboard bought from whatever the Japanese equivalent of Target is. Nearly all cars have different exhaust notes, but as you tune them they start to sound similar. Whack a stage three turbo on any car and you'll hear the same hissing sound when you let off the accelerator.

Ultimately, if you loved the first game there's no doubt you'll love this one even more. It's the most accurate driving simulation yet made, and it may be the last truly great game we see on the first generation PlayStation. The pants-wettingly good opening movie, basically one long preview of *Gran Turismo 2000* for PlayStation2, will give you an idea of what we have to look forward to in a year's time. One wait is over, but the next has just begun.

HOW THEY COMPARE

■ GRAN TURISMO 2

The new king. A huge number of cars and so much stuff to unlock you'll be playing for months.

■ GRAN TURISMO

The same great handling and graphics as the sequel, but it's over sooner.

■ RIDGE RACER 4

Looks even better than *GT*, gameplay more arcade-style than sim.

■ COLIN MCRAE RALLY

Awesome rally sim, good graphics and handling. Just not as deep as *GT 2*.

■ TEST DRIVE 6

Don't keep this on the same shelf as *GT 2*; crappiness might be contagious.

GRAPHICS

■ This is it for the PlayStation. *No más*. Six cars on-screen at the same time, no drop in frame-rate. Beautiful replays.

SOUND

■ Many engine sounds sampled from their real-life counterparts, and they change as you tweak. Good in-game music.

CONTROL

■ Not much room for improvement here. Video game bliss, and good use of the dual shock rumble too.

THE WHEEL DEAL

Right, here's a **big hunk of plastic**; clench it **between your legs** and give it a good wrenching. Now try it with one of these **steering wheels**.

But seriously folks, you like your driving games as realistic as possible. Now that *Gran Turismo 2* is finally here, is it worth the extra cash outlay to get a steering wheel? Or would that just be venturing too far into scary freak gamer territory?

InterAct Concept 4 Racing Wheel

The Concept 4 has InterAct's previous model beat, but not by much. It still doesn't offer enough steering control to be worth abandoning the Dual Shock. It can be mounted on a desk, or you can kind of sit on it, straddling that steering column as you would a mega-sized slurpee on the drive back home from the Quick-E Mart. Either way, it's not the most comfortable of arrangements. Nothing happens for about a quarter of a turn off-center, the metal shift paddles are nasty, and the pedals are too light and easy to kick around.

Mad Catz MC2 Racing Wheel

The latest wheel from Mad Catz is not only their best yet, but the best real wheel experience we've ever had on the PlayStation. The wheel feels sturdier than most, although the pedal box could be a little heavier, and it's also the only one in the group to have a stick shifter as well as wheel-mounted paddles. More importantly, the wheel's off-center dead zone is adjustable, as is the overall sensitivity, allowing you to set it up just the way you like it. And the MC2's got slide-out leg braces so you can play with it in your lap if you don't want to secure it to a tabletop. Bonus.

Saitek RX150

The newest PlayStation wheel out there, the RX150 is an odd bird. It comes with this wacky Styrofoam attachment so you can go the lap route, but it doesn't feel very stable, not to mention comfortable, clenched in a death-grip between your knees. Like the Concept 4, it needs almost a quarter-turn before your car reacts, but it turns progressively from that point on, so with a little practice it's not terrible. The RX150 doesn't feel sturdy enough, though; the flimsy shift paddles are mushy and you really need to bend those suckers before anything happens.

NISSAN SKYLINE GT-R V-SPEC

The Skyline may be good in *Gran Turismo 2*, but it's great in real life.

h, doctor. This car may look like a Honda Accord with a silly wing, but it's guaranteed to play havoc with your bladder control. Nissan's flagship model has always been a Japan-only thing, at least until now; sports car importer Motorex has finally answered our prayers and is selling right-hand-drive, road-legal Skylines to anyone who's got the necessary bank.

The Skyline GT-R is the kind of car that makes crap drivers into heroes, much like it does in the game. With computer controlled four-wheel drive, give the Skyline a good shoeing and the rear end will step-out – and stay out. Just keep your foot buried, and the car takes care of the rest. It's uncanny and strangely addictive. In the game, it's equally easy to drift through corners, but you have to be careful with the power around slow, tight bends if you want to stay on the track.

There's a lot of wheel spin off the starting line in *GT 2*, but the Skyline isn't so quick to light up the tires on real tarmac. Acceleration is leisurely until the turbo kicks in, around 3500rpm, and then all bets are off as the revs rise and the engine growls up to the 8000rpm redline. The car sounds almost as good in the game as it does in real life – *Gran Turismo 2* captures the Skyline experience as well as we could hope, without the danger of retinal detachment. And without the \$89,500 sticker price.

The sleek TT is the perfect mode of transport if you're looking to impress a lady friend, but if you're the leadfooted type, you'd be better off getting your TT driving thrills in *GT 2* rather than on real roads. Over in Germany they've had a minor problem with TTs flipping over and crashing spectacularly at high speeds due to questionable aerodynamics, so most of them have been recalled. Forsprung durch what now?

Our turn behind the wheel of the real version wasn't quite as dramatic, although we did get a few sour looks from people who must have assumed we worked for an internet start-up. Young punks in expensive cars aren't a favorite with the locals in San Francisco.

The TT's engine is quieter in reality than in the game, and the sharp brakes are like an on/off switch – not so different from a square button, come to think of it. The flesh and blood (er, aluminum and motor oil) TT is a little more prone to understeer if you're really going for it, too, but otherwise it's a reasonable facsimile.

GAME GLANCE

- 4 Different cup competitions
- 7 Kinds of sushi in the Sushi-Go-Round game
- 9 Mini-games
- 50 Hit points for all rental Pokémon
- 150 Different Pokémon

Are you one of those Poké freaks who's spent many hours lovingly raising your tiny Charmander into a Level 59 Charizard fighting machine? Do you even know what I'm talking about? If you answered yes to either question, chances are you're going to love *Pokémon Stadium*.

Stadium is the first title by Nintendo to come packaged with the new N64 Transfer Pak, an accessory that plugs into your N64 controller and lets you access saved information off of Game Boy cartridges. So, any gamers who have whiled away hours building up their stable of Pokémon on Game Boy will be psyched to see their hard-trained pocket monsters in 3D glory. To continue improving your collection, you can actually play the Game Boy game itself on your TV through *Stadium*.

But even if you haven't had your nose to a Game Boy screen lately,

you can choose from 150 kinds of Pokémon from the *Stadium* "rental" area, where all the monsters are at a very respectable Level 50 training ability. Some veteran players may want to try out some of the rentals just to get a look at other monsters' fighting styles.

Once you get sick of the turn-based RPG battles, check out the challenging and often hysterical mini-games. In the zany Lickitung "Sushi-Go-Round" game, gobble up as much of the most expensive sushi possible before time runs out; or keep your Hypno monster from

falling asleep in "Hypno Hynosis."

If you're already a *Pokémon* hater, *Pokémon Stadium* is not likely to make you a convert. But fans will recognize that this colorful, entertaining game is the best Nintendo *Pokémon* title yet.

YOUNG BLOOD

Peter Schaefer, gamer from way back and one of the **NHL's hottest rookies**, talks hockey, games, hockey games and **mullets** with our man on the ice, John Gaudiosi.

Name: Peter Schaefer

Years as a hockey

player: All my life.

Years as a gamer: Ditto.

Game systems owned: Atari, Colecovision, Genesis, PlayStation.

Favorite games: The *NHL* series on Genesis and PlayStation, *Donkey Kong*, and *Asteroids*.

Years as a firm believer in the classic hockey mullet haircut: Zero.

Electronic Arts spent a week last December (five 12-hour days) motion-capturing a quartet of NHL players from the Vancouver Canucks in Vancouver, British Columbia. Over 400 moves were captured to enhance the PlayStation and PC versions of *NHL 2001*. Additional captures were taken for the PlayStation2 version, which should be the most realistic console hockey game ever.

Twenty-two-year-old rookie sensation Peter Schaefer, left wing for the Canucks, spent a few hours lending his moves to the virtual hockey experience. Garbed in a special motion-capture suit, Schaefer took to the ice against teammate goalie Kevin Weekes and then spent some time in the optic limelight. Afterwards, he took a time out with *incite* to talk about video gaming.

How long have you been playing video games?

I've been gaming my whole life. I used to spend time in the arcades and I bought all the console systems when they came out – Atari, Colecovision, Genesis, PlayStation. I love the classic games like *Donkey Kong* and *Asteroids*. I used to play *NHL* a lot on Genesis, but now that I'm playing in the NHL, I don't have much time for video games. When I do have time, I usually play on my PlayStation.

Have hockey video games helped your NHL skills at all?

It's always been my dream to play in the NHL, so I think my hard work and perseverance got me to where I'm at today. I might have learned a few things from the video games. Hockey's a great sport. Sometimes kids don't get a chance to play it on ice, so video games are a good way to introduce the sport to them, but nothing replaces going out and practicing and working hard on the ice.

Being a young player, do you think video games have more influence on professional athletes?

We have a fairly young team here in Vancouver, and a lot of the guys play video games on the plane trips and at home. We grew up playing video games and playing hockey. The most popular thing right now is laptop computers. A lot of the guys play on long flights. PlayStation's popular when we're home.

What's it like knowing that your moves will be incorporated into *NHL 2001*?

It's exciting for a young guy like myself to put on this gear and be out here [on the ice] learning how the motion-capture process works and seeing how my favorite video game is made. It's an amazing process and the technology is so advanced.

How are you handling the media attention this year as you're being touted as a candidate for Rookie of the Year?

It's a great opportunity for me. A lot of people have put trust in me and my abilities. Right now, I want to stay focused on this season and look ahead to the playoffs.

Why do hockey players still wear mullet hairstyles?

[*Laughing*] I don't know, my hair's always been short. But a lot of guys have gotten haircuts this year [Tony Amonte and Jaromir Jagr]. ☺

"Sometimes kids don't get a chance to play it on ice, so video games are a good way to introduce the sport."

ROAD RAGE

It was battle of the bands time when the rock bands **P.O.D.** and the **Guano Apes** squared off in bouts of *Sega Rally Championship 2*, hoping to win a new Dreamcast. Paul Semel waved the checkered flag.

For most high-school and college musicians, playing a battle of the bands contest is a much welcomed way of making new fans and maybe winning a little cash as well. Sadly, most rock groups have to leave these contests behind when they hit the "record an album and tour like mad" circuit.

It was with this in mind that we invited two bands fresh to the recording/touring lifestyle — P.O.D. and the Guano Apes — to the Holiday Inn in Columbia, South Carolina, to participate in our own battle of the bands, with the winning driver taking home a brand new Dreamcast.

The rules were simple. Scrubs were eliminated early on, leaving Henning, Dennis, Wuv, and Sonny to battle together to determine the ultimate champion. The car of choice? The Lancer Stratos, on the Muddy 1 track. The final round was a first-to-two-wins, five-lap epic on the Mountain 2 course.

P.O.D. (Top to bottom) Traa: Bass, Sonny: Vocals, Wuv: Drums, Marcos: Guitar

"I thought this racing game was cool. A lot of them that I've played before have been too sensitive, and this one wasn't."
— Sonny, P.O.D.

FIRST EVENT

HENNING VS. DENNIS

With the track buried in mud, both Henning and Dennis spent much of their time slipping and sliding into the guardrails. However, Dennis would soon learn how to negotiate the track much better than Henning.

Winner **DENNIS**

Word from the winner:
"I'm still a professional."

SECOND EVENT

WUV VS. SONNY

Though both drivers found this course to be a little on the dark side (and not in a Darth Vader kind of way), Sonny found the mud easier to negotiate than Wuv, who crashed into the walls like The Force wasn't with him.

Winner **SONNY**

Word from the winner:
"Y'all can't see me."

SOUND:

Traa: "The sound was good, so were the effects. The music was terrible, though."

Stefan: "It's not bad."

CONTROLS:

Dennis: "I like to drive my own car better, but it was OK."

Wuv: "I thought it was cool that on some tracks the steering was good, but on the muddier one it was a little harder to steer."

FINAL ROUND

DENNIS VS. SONNY

Bursting from the start line, Sonny took the lead but then lost it when Dennis passed him on the first curve. This proved to be the race's deciding moment, and Dennis sped home. The next round would be the decider.

FINAL ROUND FINAL RACE

Grand Champion DENNIS

Word from the winner: "Thanks to P.O.D., they were fair enemies, but not really enemies."

DENNIS VS. SONNY

Sonny took an early lead, lost it, then got it back. But during the second lap, Dennis won the lead back, only to see Sonny draw closer, but it wasn't enough. The two drivers followed each other for the rest of the race.

THE REAL DEAL

P.O.D.'s album is called *The Fundamental Elements Of Southtown*.

Guano Apes' album is called *Proud Like A God*.

The Good, the Bad, and the Bad Ass

Only the powerful will survive V8's fight for vehicular supremacy. The rest just end up as burning shells of scrap metal. **by Brett Rector**

It's a dog eat dog world, and your butt's gonna be the Milk Bone if you don't know the layouts of V8's landscapes. We give you eight maps, showing you where to find every weapon and power-up, along with the placement of each level's Quest objective.

General Tactics Picabo

The Skis N' Treads are the most essential propulsion mechanisms for its level. When you're in the snow, you gotta have it attached to your

vehicle at all times, otherwise, you'll suffer more than just a broken leg.

Chevy in the Levy
If an enemy is hammering you, drive your vehicle into

any body of water or pool of nuclear waste. You'll be instantly placed in a safer spot.

Hand Job

Before starting your engine, hop into the options and reconfigure the default Brake/Reverse control to Handbrake. You'll be able to bust killer 180s and blaze around tight corners with pinpoint accuracy, which is especially helpful when avoiding your fellow combatants.

Ram 'em Down

If you're driving a rig bigger than your opponent's, smash into them to knock 'em over, to bang 'em up, or just to piss 'em off.

The Weapons of War - Killer Combos for New-Age Outlaws

Interceptor Missiles Speed: 100 mph max. Range: 1200 ft.	Bull's Eye Rockets Speed: 120 mph Range: 650 ft.	Bruiser Cannon Caliber: 60mm Range: 850 ft.	Sky Hammer Mortar Caliber: Classified Range: 1000 ft.	Roadkill Mines Caliber: Classified Range: 5 ft radius	Brimstone Burner Caliber: Classified Range: 50 ft.
Homing missile developed at Site-4. While quite agile, its tracking accuracy is dependent on target's size. Perfect for buses and RVs.	This homemade rocket is quite powerful, but has limited range and no tracking ability. Fire at opponents head on for fast, furious damage. Use them relentlessly!	Unfortunately, its 360-degree auto-tracking turret is rather slow, thus not very effective while on the move. Very powerful should it strike the target.	This weapon was kept under wraps until Sid broke into Site-4 and stole it. Adapted from a recovered UFO, the Sky Hammer fires an explosive charge of semi-intelligent alien matter.	The Roadkill is a surface mine, manufactured specifically for mobile combat situations. The mine only detonates on contact with other vehicles. Sit back and watch the fireworks.	This leathal device consists of a simple fuel container filled with oil and a cylinder containing gas propellant. Just the right cocktail to fry your opponents with.
HALO DECOY Fires off a missile to act as a decoy to incoming enemy fire. Effective when you remember to use it.	ROAD RUNNER Fires a special non-explosive rocket which sticks to your opponent's vehicle and pushes them out of control.	COW PUNCHER Fires a non-explosive force blast which knocks over your enemies' vehicle, sending them on a rather unpleasant trip.	TURTLE TURNOVER Fires a non-explosive force charge which tends to bounce vehicles into the air, flipping them upside-down.	BEAR HUG Mine retrofitted with a gravitational device. The Bear Hug is activated automatically when a vehicle is near, immobilizing it for 5 seconds.	RING OF FIRE Shoots ball of flame that bounces twice on the terrain, causing a ring of fire to appear each time.
Cost: 2 missiles Up-Up-Down + Machine Gun	Cost: 2 rockets Up-Down-Down + Machine Gun	Cost: 2 shells Down-Up-Down + Machine Gun	Cost: 2 shells Down-Down-Down + Machine Gun	Cost: 2 mines Left-Right-Down + Machine Gun	Cost: 10 units Right-Left-Up + Machine Gun
AFTERBURNER Fires one missile without detaching it, resulting in a brief burst of speed. Use it to quickly get away from someone.	STAMPEDE Fires up to six rockets in rapid succession at whatever is directly in front of your vehicle.	BUCKSHOT Fires up to six shells at once. It'll toast a cornered opponent, and it works great as a finishing move.	CRATER MAKER Just like its name implies, creates a huge crater for your enemies to get caught in. Now, bring the heat.	CACTUS PATCH Drops up to six mines on the ground in one large patch. Needless to say, if something hits it, they'll definitely wake up and smell the flesh burning.	OIL SLICK By using some of the weapon's oil supply, this creates a nice slick surface behind your vehicle once it's activated.
Cost: 2 missiles Up-Up-Up + Machine Gun	Cost: 2-6 rockets Up-Down-Up + Machine Gun	Cost: 2-6 shells Down-Up-Up + Machine Gun	Cost: 2-6 shells Down-Down-Up + Machine Gun	Cost: 2-6 mines Left-Right-Up + Machine Gun	Cost: 5 units Right-Left-Right + Machine Gun
MISSILE SWARM Fires up to four missiles at once. A very effective tactic when your target is nearby and directly in your sights.	PATRIOT ROCKETS A roaming pack of four rockets that seek out and destroy airborne enemy missiles.	RICOCCHET Fires a blast that ricochets across the battlefield, creating havoc for whatever it hits.	TIRE BUSTER When you got someone hot on your tail, bust out this move to slow 'em down a little, then hang a 180 and blast.	HOVER MINE Your mines don't have to have rocket envy. When activated, it will hunt out the nearest opponent, home in, and detonate on contact.	WALL OF FLAME With this baby, you give your opponent more than just a hot foot. Creates a wall of flame, toasting anyone driving through it.
Cost: 2-4 missiles Up-Up-Right + Machine Gun	Cost: 4 rockets Up-Down-Right + Machine Gun	Cost: 2 shells Down-Up-Right + Machine Gun	Cost: 2 shells Down-Down-Right + Machine Gun	Cost: 2 mines Left-Right-Right + Machine Gun	Cost: 2-16 units Right-Left-Down + Machine Gun

Full Onslaught

The colored boxes on the maps aren't just for decoration, they actually tell you where you can get your greedy little mitts on some much-needed gadgets. Here's a clever legend to tell you what they all represent, where you'll find all your boxes color-coded.

■ **Any Power-Up:** It's a mystery.

■ **Brown Crate:** Could be a Special Weapon, or maybe just a plain ol' Brimstone Burner.

■ **Green Crate:** Special Weapon within. Use as necessary to blast your enemies.

■ **Power-Ups:** Force field, radar jammer, or a double-damage weapon upgrade.

■ **Quest Objective:** Quest mode, this is where you'll find your mission objectives.

■ **Propulsion Attachment:** If you don't know what this is by now....

■ **?:** x2 damage, shield, radar jammer, or a Repair Wrench.

Now get out there and start demolishing.

Nuclear Plant

Great lakes of toxic waste and enough electricity to light up North America.

1. Control Room

Upon entering, look for the two huge turbines with the ramp between them. If you see a green orb hovering above the turbines, drive down the ramp to repair your vehicle; if you see a red orb hovering above the turbines, coax or shove your enemy on to the ramp way to give 'em a huge shock. If neither orb is present, cruise up the ramp to the second level to peep the three computer columns. Bump the one with the green orb above it to activate the

turbines for vehicle repair, or bump the one with the red orb above it to activate the turbines for destruction.

2. Nuclear Reactors

Blast open the reactor doors to expose the lethal core inside. Hammering away at the core will lead to a massive explosion that will toast anything and any-

one within its blast radius – even you.

3. Portals

Drive through these to materialize in another spot. If you're lucky, you'll shoot up through a fenced-in pool of radioactive waste and snag a weapon power-up.

4. Transformers

Avoid driving near these at all costs! If you get too close, you'll be sucked up into the power field for the shock of your life. Of course, you can also use them to your ad-

vantage by pushing your enemy into one.

5. Forklift

No, those aren't kegs of beer they're transporting. These roaming little bastards carry hazardous drums full of toxic waste that give you something more than just a simple hangover. Definitely avoid them at all costs!

V8. TALKING CARS

FLY RIDE

Corona Stinger

This agent of law enforcement has a quick vehicle that enables you to bust around corners and maneuver out of tight spots, which is key in this level. Plus, his Hard Time special weapon is perfect to freeze your enemies in front of a nuclear reactor before you detonate it.

CLUNKER

Blue Burro Bus

Yeah, this lard ass's bus can take a lot of punishment before it's totaled, but it's just too big for the environment. The Blue Burro is easily swept up into the electrifying transformers and it has a hard time avoiding the forklift in the area's tight spaces.

HAZARDS AHOY!

Unfriendly Skies

Use hover pods judiciously. While they certainly make it easier for you to engage other airborne opponents, you'll be a sitting duck for rockets, missiles, and mortars.

Cornered!

Avoid lingering on the second level of the control room. If you get trapped in the corner when the unfriendlies are present, you'll end up a hunk of burning metal in no time.

Ghastly Bayou

Ghouls, graves, gators and demons. Zoinks, Scoob!

1. The Great Flood

To totally sink your opponents in some prime Louisiana sludge, raise both dams by shooting at the lever-wheel connected to each. If you don't want to use your ammo, you can ram the wheel with the front of your vehicle. Not a wise choice, but it's effective. As an added bonus, you'll find a Repair Wrench within your grasp as the fixture you're on rises. Snag it if you need it, or save it for later.

2. Gator Cage

While trolling through

the murky swamp, you can trap unsuspecting enemies or the vicious gator by blasting this cage. Once you have something caught inside it, you can dole out destruction at will until the cage breaks apart. However, before you can utilize this necessary tool, you must first drive through one of the ghosts roaming about to activate it.

3. Mansion Mausoleum Teleport

To activate this teleporter, you must first set loose one of the

ghosts to terrorize the mausoleum. After the mansion is properly haunted, you'll be able to successfully teleport to another area of the bayou. You also gain or lose a weapon in the process—trick or treat!

4. Grave Demons

If your inner demons won't help you in the fight for victory, the

ones in the graveyard certainly will. Drive up to a tomb and bust a magazine full of caps in its granite hide to release the fiendish specters. Once they're loose, the demons will attack the vehicle closest to them. Of course, if you're the only one around, they'll attack you, so get out there before ya get stung.

V8. TALKING CARS

FLY RIDE

Palomino XIII

Dallas's Palomino XIII is a highly responsive futuristic roadster with excellent speed and a strong shell that can withstand a lot of damage. Plus, since the Palomino constantly hovers, you won't have to worry about getting totally stuck in the Bayou's sugar cane field.

CLUNKER

Grubb Loader

No one likes to take out the trash, and when travelling through the bayou, you definitely don't want to be behind the wheel of a vehicle that carries it. The Grubb Dual Loader is able to withstand loads of damage, but its slow speeds and hulking body style make it easy pickings for the rest of the crowd.

HAZARDS AHOY!

Gator Raid

The swamp contains its fair share of Repair Wrenches and weapons, but it also contains some big ol' reptiles. While you're busy blasting away at someone, one will sneak up on you and take a bite of your bumper. However, if you can trap it inside the cage, the gator yields Special Weapons and Repair Wrenches.

Steel Mill

Bury your enemies under molten metal or crush 'em with a rolling drum.

1. Railway Switches

While cruising throughout the level, you'll notice handy railway switches to change the train's direction. Use these babies to your advantage by tapping them at just the right time to send your opponents to the morgue.

2. Magnetic Crane

Hitch a ride on the

world's biggest magnet to safely avoid the enemy and take a breather.

3. Hot Molten Steel

The '50s version of the blob will seem like a friendly entity compared to these rolling molten mounds of steel. Blast the hot iron cauldrons inside the mill to get these liquid metal demons moving.

4. Teleport Tunnels

A fan favorite of anyone that's getting straight-up worked over. No hassles, no fuss: simply drive through one to materialize away from the danger that's lurking all around you. Of course, there's probably danger lurking on the other side of the portal, too.

5. Rolling Drums

If someone's hot on your tail, make a break for these babies and blast the support beams holding 'em to flatten your opponent. Of course, once you've

let these drums loose, they'll continually roll through the area.

Needless to say, these rolling drums of death don't really give a damn what they hit or who they destroy, so be aware of where they are at all times when you're cruising through the area, lest you receive a an embarrassing side-swipe.

V8. TALKING CARS

FLY RIDE

Thunderbolt

John's Thunderbolt isn't the most well-rounded vehicle cruising V8's streets, but it's fast enough to ditch just about anyone on your tail. Use his speed to coax opponents into following you through the field with the rolling drums, then blast out the supports and leave 'em flattened.

CLUNKER

Turnary

She can weave through the terrain with the best of them; unfortunately Obake's cycle can't take a beating. With the combination of deadly plasma blasts and rolling mounds of steel, as well as the firepower of the other combatants, she's easy prey.

HAZARDS AHOY!

Flame On

Beware of the flammable coal mounds. By cruising too close to one, you're liable to end up burned by hot gas and melted by the molten metal.

Moving Ingesta!

You may harken back to the days of *Donkey Kong* and remember maneuvering Mario to jump over over those annoying blocks of steel in the third stage. Same results here, hit 'em and get scorched.

Winter Games

Gondolas, hooks, deadly competitions, and a lot of red snow.

1. Gondola Ride

If you need to get to the top of the mountain in style or want a plush cruise down the slopes to catch a Repair Wrench, blast through the doors to the entrance of the gondola and hitch a ride. Beware: Even though it may seem like you're protected from the enemy, you can still get tagged on your trip.

2. Tow Hook Lift

It's faster than the gondola, but it's definitely a more treacherous ride. Make sure you don't clip the hook at

an angle, or you'll be thrown to and fro on your way up. If your vehicle gets too out of control, you'll bang into ground or into the lift's support beams, which may cause your vehicle to unhook before you reach the top.

Gangland Olympics
Utah offers three Olympic-style competi-

tions where you can collect weapons and helpful power-ups by setting the best times and distances.

3. Long Jump

Cruise to the top of the mountain, blast off the doors to the tower supporting the massive ski jump, and hitch a ride up. As you speed down the jump, right before

you launch off the lip of the ramp, use the Afterburner Combo to gain extra distance and take home the prizes.

4. Bobsled Run

At the top of the mountain, look down and to your right to find the entrance to the bobsled run. Once you pass through the starting gate, you'll pick up speed and begin your descent. Reach the bottom in record time and head to the podium to your left to pick up the goodies.

5. Ski Race

Get to the top of the mountain, then look down and to your left to peep the ski race's starting line. Make absolutely sure you're equipped with the Skis N' Treads before you get down to business, or you won't have a snowball's chance in hell of winning. Slice through the middle of the flags, maintaining tight control the whole way down, and the podium at the bottom will be ripe with destructive fruit.

V8. TALKING CARS

FLY RIDE

Samson Tow Truck

She's a destructive cybernetic diva driving one of the most tip-top vehicles around. Her lethal combination of speed and acceleration, as well as her truck's tough chassis, make Houston a tough chick to take out – in any environment. You betta recognize!

CLUNKER

Dakota Stunt Cycle

These guys make look like they got it goin' on, but being exposed to the elements, their penchant for taking damage is just too great to risk in Utah's snowy wasteland.

HAZARDS AHOY!

Hook, line & Slaughtered

While the Tow Hook Lift makes for a speedy trip up the hill, it also leaves you totally exposed to lethal fire. Use as a last resort or if there are only a few opponents left.

Trapped

When you want to catch a ride on the gondola, wait outside the structure. If you park yourself inside the waiting area, you risk being trapped, cornered, and pummeled.

Launch Site

Homicidal rocket engines, destructives wind tunnels, and sharks. Oh, my!

1. Wind Tunnel

While blasting away with reckless abandon, be aware when you come close to these destructive tunnels. If you stray too close, you'll get sucked in and tossed straight into the drink. Oh, you'll also suffer a fair amount of damage on your way through. Leave that fate to your enemies

2. We Have Lift Off

Drive through the tunnel behind the rocket when the lights leading into it are green to get hurled up into the air for a short, scenic ride. As you fall back to Earth, twist and turn your vehicle to grab the power-ups and weapons that you pass on your way down.

3. Rocket Test

Take out the rack holding these engines and they will attack the closest enemy to them. Make sure you're nowhere near said enemy, otherwise you'll take some of the heat you had planned for your opponent. This is a good way to knock your opponents off their Goodyears and blast 'em with a few shots while they struggle to right themselves.

4. 3-2-1-Yawn

Blow open the door to the control room, located right behind the

rocket mover, then drive on in. Upon entering this tiny area, you'll hear an electronic blip, signaling the rocket to the launch pad. Once the rocket is in place on the pad, return to the control room to launch it into space. If you're lucky, someone will get close enough to check it out and get scorched.

V8. TALKING CARS

FLY RIDE

Goliath Halftrack

Who says a man of the cloth can't be a warrior, too? Destino's Goliath Halftrack is sturdy enough and possesses just the right amount of quickness to survive. His Hades Gate Special Weapon will send the world's hell spawn back where they belong - in the dark.

CLUNKER

Xanadu RV

The Cultsmen's rig is just too big to cruise around in such a hotbed of bombarding activity. While it possess a tough shell, it'll get crucified by the electric fences, mobbed by the security guard towers, and puréed by the wind tunnels' rotary blades.

HAZARDS AHOY!

Electric!

The Launch Site is littered with deadly electric fences. Not only do they shock if you ram into them, they also knock you into the air, making you an easy target.

Line of Fire

To add to your woes, Florida contains a host of guard towers with willing gunmen at the top of each. Make it a priority to attack and destroy them as you roll by.

Meteor Crater

A Roswellian story is played out with cops, donuts, bugs, and a big meteor

1. The Big D

For some reason, cops are lurking around a desolate desert, which means a donut house is nearby. In fact, there are two. On top of these most holy of eateries is a huge symbol of fried bread just waiting to be unleashed unto the world. Blast the shop to send these large donuts roaming through the level to flatten anything in their path.

2. Death to Science

Destroy the Observatory building to unleash the heavens' wrath in

the form of a big-ass meteor. Once it crash-lands in the center of the huge crater (2A), you can blast it to release a terrible force. No, not a killer fungus, a huge mutant space ant. Now play exterminator and blow it up, or drive away in terror as it mercilessly pursues you while spitting radioactive venom.

3. Teleport Vacuum

Ah, relief. Just as before, if you're being pursued by sinister enemies hell-bent on your destruction, simply drive through one of these vacuous holes to get yourself to safety, for a brief moment.

4. Gas Stations

While you won't need to fill up during your

fight, you may need to repair your vehicle. Head to one of these handy-dandy stations and pull alongside the pump for a little tune-up. Now get in there.

5. 5-0 Rollin'

The bad boys of prime-time television won't open fire on you, but they will try to ram you. Be on the lookout for the police and stick it to them before they do the same to you. You'll often find them hangin' out near the donut shop, probably stuffing their faces with bear claws.

V8. TALKING CARS

FLY RIDE

Vertigo

Chassey may look like a typical blond, but she has the fire of a scorned brunette and the voracity to back it up. Her silver Vertigo vehicle can't withstand damage like Houston's truck, but it's quick enough to outrun just about anyone. Plus, her Star Power Special Weapon is one of the more powerful in the game.

CLUNKER

Dakota Stunt Cycle

Hate to pick on these stunt-show fly guys twice, but they'll get absolutely totaled here. Meteors crashing from space, mutated ants spewing nuclear acid, and the rest of the playing field will KO the trio in no time.

HAZARDS AHOY!

Outer Space

Arizona is a hotbed for ET activity, and it also appears to be a magnet for meteorites. Keep your vehicle moving at all times, otherwise you'll get pummeled and scorched.

Alaskan Pipeline

Exxon has nothing on this veritable wasteland of combustible oil and killer whales.

1. Oil Slick

Be aware of your enemies while cruising through the Texas tea. While you won't get completely stuck, you will get slowed down enough to take a beating from those around you. Plus, when you exit the black goo, you'll leave behind a trail that your opponents can ignite to set your ride ablaze.

2. Cruisin' the Bay

After grabbing all the power-ups on land, pick up a Hydrofloater and plunge into the bay. Look behind the oil

platform, as well as behind the lone island, to find many hidden goodies. Oh, while you're out there, make sure you avoid the killer whale swimming about. It may look harmless, but whale inflicts damage to your ride if you get in its way.

3. Titanic Killa

Sill jonesin' for more weapons and power-ups? Then set your sites on the small ice bergs aimlessly floating about. You can destroy these overgrown popcicles by blasting them or ramming into 'em,

then rejoice as they spew out stuff you can really use.

4. Oil Pipeline

While on land, pick up

some much needed weapons by locating and driving through Alaska's pipelines.

5. Oil Drums

You'll find these little drums full of crude quite useful. Wait until your opponent gets close to one, then blast it with your guns or flame thrower. The ensuing explosion will knock 'em up in the air, leaving them vulnerable for a quick second.

V8. TALKING CARS

FLY RIDE

Tsunami

Obake's Tsunami cycle is quick and agile, with a body design that enables her to whip around the various oil refinery structures with ease. Make sure to use hit and run tactics on the other opponents, because she will definitely get lit up like Christmas if cornered.

CLUNKER

Mojo Trekker

This poor chimp has nothing going for it besides decent acceleration and a penchant for avoiding occasional enemy fire. Another downside is that he's easy to knock over, given his big balloony tires, making him easy prey for a barrage of firepower.

HAZARDS AHOY!

Orca

Lurking in the bay is a killer whale to make your life miserable. Be extra careful when taking a dip, otherwise you'll end up like Bo Derek.

No Swimming

Beware of the huge lake of oil. While it's not as dangerous as the Bayou's sugar cane fields, your pace will be hampered, leaving you susceptible to enemy fire.

Pacific Harbor

Harboring fear and destruction in the port of Long Beach since 1999.

1. Warehouse

When you absolutely, positively have to get yourself away from incoming fire, drive through one of these babies to be instantly whisked away. As you emerge, you'll either be tossed onto dry land, or equipped with a Hydrofloater when you emerge from the darkness. So get your finger on the trigger.

2. Lighthouse

Blast off the doors to open the entrance to the transport, then drive on in. You'll be immediately shot to

the top, then hurled out like Garth's spew. As you make a hasty exit, you'll be equipped with a Hoverpod. Hold down on the D-pad or analog stick while you make your descent to land on the roof below and in front of you to collect the Repair Wrenches and weapon power-ups located on top.

3. Weigh Station

Like the Nuclear Plant's Control Room, you'll find this spot handy when your vehicle starts looking like Fred Sanford's jalopy. When the green light is on, drive on in for a quick tune up. Now get back in there and continue the carnage.

4. Large Cranes

In the event you fall into the water without a Hydrofloater attached to your vehicle, a large crane will come to pull you across the harbor's channel to safety. However, like the Tow Hook

Lift In Utah, you'll be exposed to the unwelcome firepower of your adversaries—so don't take a swim unless you're prepared.

5. Supply Trucks

These small semis move about the docks loading and unloading supply containers. They won't make an attempt to attack you, but they will push you around if you get in their way. This is especially troublesome when you're trying to avoid being totaled by your opponent.

V8. TALKING CARS

FLY RIDE

El Guerrero

She may be from south of the border, but Nina can blow the competition into the Northern Hemisphere with her Lemming Missile special weapon. Nina's tough '70s low-rider is equipped with excellent speed and can take a pretty good beating in the process.

CLUNKER

Marathon

Boogie's car packs one of the best and more visually spectacular Special Weapons, the Disco Inferno, but his Marathon is ready for anything but. Lack of speed and weak chassis armor make him susceptible to a whole lot of punishment.

HAZARDS AHOY!

You sank my battleship!

While the waterways offer lots of power-ups and Repair Wrenches, they're definitely treacherous. Your enemies will be able to line you up from the docks and surrounding peninsulas to knock you around while you hopelessly struggle to gain control and make it to dry land.

Go Where You Want Do What You Want

GameShark opens doors and takes you places regular codes can't get to.

Pool Sharks screw you out of money. Loan Sharks screw you out of money and break your kneecaps. GameSharks allow you to beat the hell out of every video game you own – and in this wonderful scenario, you're the one doing the screwing...if you so choose. Here's why you need one of these devices....

Before we get into the codes and so forth, let's start with the basics: GameShark is available for PlayStation, Nintendo 64, Game Boy (Color, Pocket), Saturn, and in the very near future, Dreamcast. It's worth pointing out that InterAct Accessories (makers of GameShark) has recently released the GameShark CDX for PlayStation, which functions with the parallel-portless 9000 series PSX. CodeBoy, the guy who hacks all the codes for the GameShark and is the admitted mascot for the product comments, "Up to this point, we've been able to successfully support a GameShark for every gaming platform, even with some hardware changes and software conflicts. We plan to stay on top of the current line of consoles and games, and it's a safe bet that you'll see GameSharks for some of the upcoming systems." We tried to dive a little deeper, but he was unable to comment officially on some of the upcoming and current development projects. Furthermore, he reeked of bread and butter pickles and was very difficult to hold a coherent conversation with – But that's beside the point. So maybe you're wondering just how this GameShark thing works and what exactly it does, technically and non-technically. To put it simply, the GameShark tricks the game into thinking you have infinite lives, infinite health, infinite ammo, all the weapons and items – Anything that is a variable in a game can be changed with the GameShark. This doesn't mean all the fun gets sucked out of your games, it means that you can get a lot more play out of them and do some things that would ordinarily be impossible.

Do you remember that N64 game *GoldenEye*, for instance (it suffered mild popularity)? With the GameShark and *GoldenEye*, you can: 1. Access previously unusable levels of the game in Deathmatch mode. Yes, in the Deathmatch mode! 2. Visit the mysterious island, which can be seen from the dam with the sniper scope (there's nothing on the island, but you can go there). These little bonuses are in addition to your choice of infinite health, infinite lives, infinite time, all objectives complete, etc. Just a simple example of the types of things you can do with a game and a GameShark.

Have a look below at some of the more recent, hotter codes the people at GameShark.com have come up with. Of course, you'll need a GameShark to use these codes – So don't be confused about where to enter them. When we spoke to CodeBoy, he mentioned he was working on a code for "infinite chimps" – We'll be on the lookout for that one, and so should you.

For more codes (including different codes for the games presented here) and an all around cool gaming site, be sure to go and check out www.gameshark.com. Maybe there's something about this chimp code on the site....

TECHCHECK

MICK WEST Lead Programmer
Neversoft

Meet Mick. With 11 years programming such "ultimately forgettable" games as *Darkman* and *Steve Davis World Snooker*, he's also worked on *Skeleton Warriors* and *MDK*. This guy has strong words about pop-up.

What are some games that have really nasty pop-up problems or fog?

This problem occurs on multiple systems. On Nintendo, they usually use fog to cover it up. PSX games tend to use the "around the corner" or the "I don't care" technique, as fog is harder to do on the PSX. I'd rather not name names, though.

What do you think are some excellent examples of little pop-up?

Spyro the Dragon is technically brilliant. At some points you can see all the way across a level. They obviously have some very talented programmers there. It shows what you can do with a little thought.

What are you working on next?

I can't talk about it...but it probably involves wheels, and maybe decks.

Want to talk trash about any of your co-workers?

Er, no. I love them all. Except for Chris perhaps. He's a loud-mouthed, redheaded Yorkshireman who can't drive, talk, or take his booze. Well, that and he told an embarrassing story about me during my wedding.

Do you skate or at least try thrashing for the sake of *Tony Hawk*?

I've skated on Joel's [Neversoft's President] halfpipe that he built in his yard, and I still have the scars. I also have a collection of fingerboards [small boards you place your fingers on and "skate" on a desk], with which I skate every day.

If you were a vegetable what would you be?

I'd be a nut.

Pop-up Video

Why do backgrounds ping into view? The reasons behind pop-up – revealed!

"If you see pop-in on the PS2, then the developers should be taken out back and shot."

Imagine you're driving down the road and suddenly you make a quick left. Before you realize it, a sheer wall of rock is right in front of you. Now how the hell did *that* get there? It was clear as day two seconds ago, but now you're staring straight into Mount Kilimanjaro. That, my friends, is pop-up.

Thank God it only happens in games, but why does it do that at all? Well, you can blame it on two factors: lazy programming and heavily detailed environments. But many times, it's just a problem with your game hardware itself.

Think of pop-up problems with a pretty simple formula: It's a constant trade-off between pushing back the clipping distance (the cut-off point on the horizon) and keeping a solid frame-rate. The more you show, the slower you go.

Still, we're sad to report that some games (as shown below) just slip through the cracks. We asked Mick West how sloppy programming should be dealt with: "A few developers nowadays could do with a bit of a slapping. There is no excuse for really bad pop-in, and where you see it in current games, it's due to programmers not taking the time to

really look at the problem." He also went on to say that, "If you see pop-in on the PS2, then the developers should be taken out back and shot." Harsh, but fair words, Mick.

How did he work around it? "A combination of cunning level design and careful programming. You can lay out the levels in such a way that when something pops in, the player won't notice it. First, things can pop in just around the corner – most often used in racing games – or by subtle use of fog, to ease the transition. We tried to use a combination of both."

Another trick often used is to change the Level of Detail (LOD). As things get further away, you draw them with less and less detail. A car could be 100 polygons close up, but in the distance it's only two pixels high, so you can just draw it as one polygon and not choke up the system.

Now that you know what goes into making a game as smooth as possible, you should appreciate the games that are like poetry in motion. So the next time you're out driving in *Gran Turismo 2*, pull over to the side and enjoy the scenery.

- Darren Gladstone

Pac-Man GHOST LOVE Shocker!

Illustration by Fred Harper

This month I sat down with the video game world's hottest couple, *Pac-Man* ghosts Blinky and Sue. In case you've been living under a rock, Blinky and Sue confessed their love for each other during a recent, tear-filled Barbara Walters interview that sent shockwaves through the entertainment industry.

Since that fateful day, the happy couple has been busy working the daytime talk show circuit. I caught up with them in Jerry Springer's green room for a quick heart-to-heart-to-heart.

Yet you kept your relationship a secret for so many years. Why?

Sue: Well, we didn't want to rock the boat, Rod. Back in the early days of *Pac-Man* fever, it was like we were the new Beatles. We didn't want to mess that up. Of course, Inky and Pinky had something going on from day one....

Sue: So very hard.

Blinky: And then she cried like a champ.

It was very moving. So what was it like being on *The Jerry Springer Show*?

Blinky: Well, the show was called "You're dating my ex-coworker and I hate you." I had no idea Inky and Pinky would be there!

Sue: Yeah, that was a dirty trick.

Blinky: I could take that Inky any day of the week, and he knows it. If he wants to start some static, I'll go anytime, anywhere. I was quite ready to kick his ass on national television.

I don't doubt it!

Blinky: But that damn bald guy who works for Springer kept getting in the way. I didn't want to hurt him.

So, Blinky, what's your sign?

Blinky: Well, I'm proud to be an Aquarius.

Uh-huh. Sue, same question.

Sue: Sagittarius, Rod!

I knew it. Good luck you crazy kids!

- Rod Furlong

Back in the early days of *Pac-Man* Fever, it was like we were the new Beatles. We didn't want to mess that up.

First off, I'd like to thank you both for taking a moment to talk, I've always been a big fan of your work.

Blinky: Well, thanks Rod, it's great to have your support.

You know, I always thought you two had a special chemistry. When did you know you were meant for each other?

Sue: You want to field that one, Blinky?

Blinky: Sure thing. Clyde was the original orange ghost, but he was incompetent. We were interviewing for a replacement, and the moment I saw Sue, it was like a lightning bolt struck me. I thought, "I...am a male ghost, and you...are a female ghost." The world suddenly made sense.

Sue: I thought he was hot. So...red. And those big, googly eyes!

Blinky: Yeah, they had a beautiful commitment ceremony in Oahu back in '82.

Sue: And of course *Pac-Man* and Mrs. *Pac-Man* were an item.

Blinky: I never figured out where Super *Pac-Man* fit in though, did you, Sue?

Sue: No. He was always the third wheel. Although, come to think of it, Jr. *Pac-Man* is the spitting image of Super *Pac-Man*.

I found myself getting very emotional watching your Barbara Walters interview. She's still got it!

Blinky: Yes, Barbara's people made it quite clear that the show wouldn't air unless we turned on the water-works. I was a wreck from the get-go; Sue's a little more stoic. But I pinched her really, really hard.

Readers! Rod Furlong wants to hear from you! Perhaps the guy from EB was surly and you want the world to know, or you'd like to remember Rod in your will and need some personal details. Suddenly, you know too much.

An adventurer as determined as Lara Croft cannot ignore the prospect of exploring a virgin tomb deep in the belly of the desert. But unless you have all the codes and strategies to help her through, the world is going down. Of course you have Sharkwire Online. You plug the modem into your Nintendo® 64 game system and you're dialed into a private gaming universe that unlocks some of the key secrets of Lara Croft. And you can even use Sharkwire Online to E-MAIL your buddies and let them know the world and especially Lara is still in one piece.
